This Key Information Memorandum (KIM) sets forth the information, which a prospective investor ought to know before investing. For further details of the scheme/Mutual Fund, due diligence certificate by the AMC, Key Personnel, investors' rights & services, risk factors, penalties & pending litigations etc. investors should, before investment, refer to the Scheme Information Document and Statement of Additional Information available free of cost at any of the Investors Service Centres or distributors or from website www.idfc.com.

The Scheme particulars have also been prepared in accordance with Securities and Exchange Board of India (Mutual Funds) Regulations 1996, as amended till date, and filed with the Securities and Exchange Board of India (SEBI). The units being offered for public subscription have not been approved or disapproved by SEBI, nor has SEBI certified the accuracy or adequacy of this KIM.

INVESTMENT OBJECTIVE

IDFC-SSIF-IP, IDFC-SSIF-ST and IDFC-SSIF-MT : To generate stable returns with a low risk strategy by creating a portfolio that is invested in good quality fixed income and money market securities. There can be no assurance that the investment objective of the Scheme will be realised.

IDFC-DBF : To generate optimal returns with high liquidity by active management of the portfolio; by investing in high quality money market and debt instruments. There can be no assurance that the investment objective of the Scheme will be realised.

IDFC-GSF-IP, IDFC-GSF-ST and IDFC-GSF-PF : To generate optimal returns with high liquidity by investing in Government Securities. There can be no assurance that the investment objective of the Scheme will be realised.

IDFC-MMF-IP and IDFC-MMF-TP : To generate stable returns with a low risk strategy by creating a portfolio that is substantially invested in good quality floating rate debt or money market instruments, fixed rate debt or money market instruments swapped for floating returns and fixed rate debt and money market instruments. There can be no assurance that the investment objective of the Scheme will be realised.

IDFC-ASBF : To generate optimal returns with high liquidity by active management of the portfolio, by investing predominantly in debt oriented mutual fund schemes and money market instruments. There can be no assurance that the investment objective of the Scheme will be realised.

IDFC-CF : To generate optimal returns with high liquidity by investing in high quality money market and debt instruments. There can be no assurance that the investment objective of the Scheme will be realised.

IDFC-USTF : To offer an investment avenue for short term savings by looking to generate stable returns with a low risk strategy. The scheme will have a portfolio that is invested in good quality debt and money market instruments such that the fund will offer a blend of liquidity with stability of returns. There can be no assurance that the investment objective of the scheme will be realised.

IDFC-CEF : To seek to generate long term capital growth from a diversified portfolio of predominantly equity and equity related instruments. There is no assurance or guarantee that the objectives of the Scheme will be realized and the Scheme does not assure or guarantee any returns.

IDFC-PEF : To seek to generate long-term capital growth from an actively managed portfolio of predominantly equity and equity related instruments. The Scheme portfolio would acquire, inter alia, small and medium size businesses with good long term potential, which are available at cheap valuations. Such securities would be identified through disciplined fundamental research keeping in view medium to long term trends in the business environment. The Scheme shall endeavor to accumulate long-term investor wealth by opening subscriptions to units during periods when stocks are available at reasonable valuations. By doing so, the fund managers would endeavour to prevent short-term money from flowing into the fund which can prove detrimental to the interests of long-term investors. As the Scheme would be sold to investors with a long-term investment horizon, it is also expected that the portfolio would remain relatively more insulated to day to day redemption pressures. The Scheme will close subscription, once it has collected a predetermined "manageable" corpus (approximate amount), which will be decided by the fund manager of the Scheme depending on the available investment opportunities in the stock market / if the fund manager is of the opinion that investment opportunities have diminished. Thus the fund manager will endeavour to ensure that there are sufficient assets available to meet the long-term objectives of the Scheme.

IDFC-IEF : To seek to generate capital appreciation and / or provide income distribution from a portfolio of predominantly equity and equity related instruments. There is no assurance or guarantee that the objectives of the Scheme will be realized.

IDFC-AF : To seek to generate capital appreciation and income by predominantly investing in arbitrage opportunities in the cash and the derivative segments of the equity markets and the arbitrage opportunities available within the derivative segment and by investing the balance in debt and money market instruments. There is no assurance or guarantee that the objectives of the Scheme will be realized.

IDFC-APF : The investment objective of the scheme is to generate income (absolute to low volatility returns) by taking advantage of opportunities in the cash and the derivative segments of the equity markets including the arbitrage opportunities available within the derivative segment, by using other derivative based strategies and by investing the balance in debt and money market instruments. However there is no assurance that the investment objective of the scheme will be realized.

IDFC-SS(50-50)EF : The investment objective of the scheme is to seek to generate long-term capital appreciation by investing in Equity and Equity related instruments. The investment objective of the fund shall be achieved by investing up to fifty percent of the assets of the scheme in a chosen sector (sector specific exposure) while the balance amount may be invested in companies across market capitalizations and across sectors (diversified exposure). The scheme may also invest in debt and money market instruments. There is no assurance or guarantee that the objectives of the scheme will be realized and the scheme does not assure or guarantee any returns.

IDFC-TA(ELSS)F : The investment objective of the scheme is to seek to generate long-term capital growth from a diversified portfolio of predominantly Equity and Equity related securities. There is no assurance or guarantee that the objectives of the scheme will be realized and the scheme does not assure or guarantee any returns. The investment policies shall be framed in accordance with SEBI (Mutual Funds) Regulations, 1996 and rules and guidelines for Equity Linked Savings Scheme (ELSS), 2005 (and modifications to them). Specified Investors in the Scheme are entitled to deductions of the amount invested in Units of the Scheme, subject to a maximum of Rs. 1,00,000 under and in terms of Section 80 C (2) (xiii) of the Income Tax Act, 1961.

IDFC-IG-GF : The investment objective of the scheme is to seek to generate long-term capital appreciation by investing in Equity and Equity related instruments. The scheme aims to capture the growth in India's Gross Domestic Product (GDP). The scheme would endeavour to represent the growth in GDP by capturing the growth in the constituents of the GDP. The scheme may also invest in debt and money market instruments. There is no assurance or guarantee that the objectives of the scheme will be realized and the scheme does not assure or guarantee any returns.

IDFC-SEF : The investment objective of the Scheme is to seek to generate capital appreciation from a diversified portfolio of equity and equity related instruments. The Scheme will predominantly invest in small and midcap equity and equity related instruments. Small and Midcap equity and equity related instruments will be the stocks included in the CNX Midcap index or equity and equity related instruments of such companies which have a market capitalization lower than the highest components of CNX Midcap Index. The Scheme may also invest in stocks other than mid cap stocks (i.e. in stocks, which have a market capitalisation of above the market capitalisation range of the defined small - midcap stocks) and derivatives. On defensive consideration, the Scheme may also invest in debt and money market instruments. In case of discontinuation / suspension of CNX Midcap Index, the AMC reserves the right to modify the definition of Mid cap and Small cap companies. In case of such a modification, the interest of investors will be of paramount importance. There can be no assurance that the investment objective of the scheme will be realized.

IDFC-EF : The investment objective of the Scheme is to seek to generate capital growth from a portfolio of predominantly equity and equity-related instruments (including equity derivatives). The scheme may also invest in debt and money market instruments to generate reasonable income. There is no assurance or guarantee that the objectives of the scheme will be realized and the scheme does not assure or guarantee any returns.

IDFC-MIP : The primary objective of Scheme is to generate regular returns through investment primarily in debt securities. The secondary objective of the Scheme is to generate long-term capital appreciation by investing a portion of the Scheme's assets in equity securities. Monthly Income is not assumed and the same is subject to availability of distributable surplus.

IDFC AA FoF (CP, MP, AP) : The primary objective of Scheme is to generate capital appreciation through investment in different mutual fund schemes primarily local funds based on a defined asset allocation model. However, there can be no assurance that the investment objective of the scheme will be realized.

IDFC-NF : Investment objective of the scheme is to replicate the S&P CNX Nifty index by investing in securities of the S&P CNX Nifty Index in the same proportion/weightage. However, there is no assurance or guarantee that the objectives of the scheme will be realized and the scheme does not assure or guarantee any returns.

IDFC-IF : The investment objective of the scheme is to seek to generate long-term capital growth through an active diversified portfolio of predominantly equity and equity related instruments of companies that are participating in and benefiting from growth in Indian infrastructure and infrastructural related activities.

However, there can be no assurance that the investment objective of the scheme will be realized.

INVESTMENT STRATEGY

IDFC Strategic Sector (50-50) Equity Fund (IDFC SS(50-50)EF) : Equity The fund aims to be an early entrant in a sector which has depth, is a core part of the Indian economy, is scalable and where the fund manager believes there is potential. The typical holding period in a particular sector will be around 1 - 2 years.

The AMC would reserve the right to invest in the chosen sector for periods less than or more than this indicated period. This structure allows the fund to take a) concentrated position in the companies in that sector and b) benefit from the positive movement in the sector. However, being an early entrant in a sector and taking concentrated positions makes the portfolio susceptible to view going wrong and the sector underperforming the general market. It shall be the endeavour to reduce this by investing only upto fifty percent of the Net Assets in the sector and the balance 50% will be run as a diversified equity fund. The fund will have a top down approach to narrow down on the sector and then cherry pick companies within that sector. This will hence be a fund where an analyst would have a very significant role to play in helping the fund manager choose a sector. The fund structure allows it to be a core part of an investor portfolio as upto fifty percent of the portfolio will have high Risk/ Return profile by virtue of its concentrated position in one particular sector while the balance amounts in the fund will be invested in a diversified portfolio. The core thus remains constant and satellites keep changing with time and changing phase of the economy.

IDFC Arbitrage Fund (IDFC-AF) : The Scheme will endeavour to invest predominantly in arbitrage opportunities between spot and futures prices of exchange traded equities. In absence of profitable arbitrage opportunities available in the market, the scheme may predominantly invest in short-term debt and money market securities. The fund manager will evaluate the difference between the price of a stock in the futures market and in the spot market. If the price of a stock in the futures market is higher than in the spot market, after adjusting for costs and taxes the scheme shall buy the stock in the spot market and sell the same stock in equal quantity in the futures market, simultaneously. For example, on 15-12-2005, the scheme buys 10,000 shares of Reliance capital on spot @ Rs. 430.00 and at the same time sells 10,000

Reliance Capital futures for December 2005 expiry @ Rs. 432.00. The Scheme thus enters into a fully hedged transaction by selling the equity position in the futures market for expiry on say 25 December, 2005. If the scheme holds this position till expiry of the futures, the scheme earns an annualized return of 16.97% irrespective of what is the price of Reliance Capital on the date of expiry. In the eventuality that the scheme has to unwind the transaction prior the expiry date on account of redemption pressures or any other reason, the returns would be a function of the spread at which the transaction is unwound. For example, if spot is sold at Rs. 430 and the futures are bought at Rs. 433 then there would be negative returns on the trade. If the spot is sold at Rs. 430 and the futures are sold at Rs. 431 then there would be positive returns from the trade. On the date of expiry, if the price differential between the spot and futures position of the subsequent month maturity still remains attractive, the scheme may rollover the futures position and hold onto the position in the spot market. In case such an opportunity is not available, the scheme would liquidate the spot position and settle the futures position simultaneously. Rolling over of the futures transaction means unwinding the short position in the futures of the current month and simultaneously shorting futures of the subsequent month maturity, and holding onto the spot position. There could also be instances of unwinding both the spot and the future position before the expiry of the current-month future to increase the base return or to meet redemption. Return enhancement through the use of arbitrage opportunity would depend primarily on the availability of such opportunities. The Scheme will endeavour to build similar market neutral positions that offer an arbitrage potential for e.g. buying the basket of index constituents in the cash segment and selling the index futures, Buying ADR/GDR and selling the corresponding stock future etc. The Scheme would also look to avail of opportunities between one futures contract and another. For example on 16 March, 06, the scheme buys 1000 futures contracts of ABB Ltd. For March expiry at Rs.3000 each and sells an equivalent 1000 futures contract of ABB Ltd. for April expiry at Rs.3030. Thereby the scheme enters into a fully hedged transaction. Closer to the expiry date of the March contract, the scheme has two options. 1) Unwind the transaction by selling the 1000 March contracts and buying 1000 April contracts of ABB. The returns are a function of the spread between the sale price of the April contract and the buy price of the March contract. If this spread is less than Rs. 30, the returns are positive else the returns are negative. 2) On the expiry date i.e. 30 March, 06, the scheme would let the March contract expire and square off 1000 contracts that it holds for April maturity. The returns would be a function of the spread between settlement price of the March contract and the price at which April contracts are squared-off. If this spread is lower than Rs. 30 then the returns are positive and if it is higher than Rs. 30 the returns are negative. The Scheme can also initiate the transaction in the opposite direction i.e. by selling the March futures and buying the April futures, if it sees a profit potential. Under all circumstances the scheme would keep its net exposures neutral to the underlying direction of the market by maintaining completely hedged positions. In addition to stock specific futures, the scheme can also take offsetting positions in index futures of different calendar month. The debt and money market instruments include any margin money that has to be maintained for the derivative position. The margin money could also be maintained partly as Fixed deposits with Scheduled commercial banks. The maturity profile of the rest of the debt and money market component would be determined by the view of the fund manager. If the view of the fund manager is that interest rates would go up then the average maturity of the debt & money market portfolio would be reduced and if the view of the fund manager is that interest rates would decline, then the average maturity may be increased. This would however depend on the view of the fund manager and can substantially change, depending on the prevailing market circumstances.

IDFC Arbitrage Plus Fund (IDFC-APF) : The investment objective of the scheme is to generate income (absolute to low volatility returns) by taking advantage of opportunities in the cash and the derivative segments of the equity markets including the arbitrage opportunities available within the derivative segment, by using other derivative based strategies and by investing the balance in debt and money market instruments. The scheme will enter into derivative based strategies to take advantage of pricing inefficiencies in the market. These strategies will be undertaken based on certain statistical models/ technical analysis carried out by the fund manager. The scheme will also invest a part of its corpus in debt and money market instruments. The scheme will target to generate returns with a low correlation with equity markets. The following strategies will be used by the fund manager : 1. Cash-Futures Arbitrage 2. Relative Value Trades 3. Derivative strategies and structured investments Additionally the fund manager may invest in debt and money market instruments for margin and cash flow management purposes. Provided below is a detailed explanation of the individual strategies proposed to be undertaken by the scheme.

IDFC Classic Equity Fund (IDFC-CEF) : The scheme will endeavor to invest in well managed sustainable businesses whose shares are available at reasonable value through a process of disciplined research. The portfolio will aim to provide part ownership to investors in some of the best run companies in India. The portfolio of securities will be well diversified across sectors, so identified, to mitigate overall risk. As the scheme is expected to be part of the core long term equity holdings of the investors, a well balanced and prudent style of fund management will be adopted to endeavor to deliver good returns at controlled levels of risk. The guiding principles while managing the portfolio are summarized below : 1) Stock prices are directly correlated to company profits over the medium to long term Fund management would focus primarily on business fundamentals of the underlying company. The Equity Research process will endeavor to acquire a robust understanding of the dynamics of the underlying business. This would form the basis for forecasts on future profitability and sustainability of cash profit growth. Stock prices of companies that can sustain periods of high cash profit growth will outperform the markets over the long term. Investors entering this scheme are therefore expected to have at least a 2-3 years time horizon. 2) Margin of Safety The fund managers will look to build a "margin of safety" while making forecasts on business profitability. "Margin of safety" will also be the guiding principle while evaluating a company's current market price. The portfolio would also be protected from company specific risks by constantly monitoring the economic and business environment and changes in management strategy. 3) Acquire stocks at reasonable value Once good businesses are identified, stocks would be endeavoured to be acquired when they are available at a reasonable value. Overall market corrections and stock price falls due to temporary factors that don't affect long-term profitability are an excellent opportunity to buy stocks cheap. 4) Stay fully invested over most periods The Fund will not try to profit by predicting overall market direction based on technical indicators or momentum. The Fund will generally stay fully invested in equities to give investors the full advantage of a rise in the markets that is inevitable given the current trajectory India's GDP growth. The scheme may however hold cash during periods where in the view of the fund manager the market valuations have run ahead of its fundamentals or when the fund manager is unable to identify stocks at a reasonable value. The scheme may also hold cash to meet anticipated redemptions or to tide over temporary adverse market developments.

Debt : The domestic debt markets are maturing rapidly with liquidity emerging in various debt segments through the introduction of new instruments and investors. The actual percentage of investment in various fixed income securities will be decided after considering the prevailing political conditions, the economic environment (including interest rates and inflation), the performance of the corporate sector and general liquidity and other considerations in the economy and markets. The Fund has put in place detailed Investment Discretion Guidelines defining the prudential and concentration limits for the portfolio limits. The investment management team is allowed full discretion to make sale and purchase decisions within the limits established. The Fund Manager/(s) record a justification for investments made, on the deal slip. Investment Management Committee (IMC) in its periodic meetings will track portfolio investment rationale, portfolio composition, performance etc. Any modifications to the Investment Discretion Guidelines can be made by the IMC and will be ratified by the Board. The performance of the fund will be monitored against its peer group in the industry and presented at every Board meeting along with the portfolio of the Schemes. The Board of Directors discusses the performance and portfolio composition of the scheme and queries will be responded to by the Managing Director.

IDFC Super Saver Income Fund - Investment Plan (IDFC-SSIF-IP) : The Scheme proposes to invest only in a diversified set of fixed income securities with the aim of generating stable long-term returns with a low-risk strategy.

IDFC Super Saver Income Fund - Short Term Plan (IDFC-SIF-ST) : The Scheme proposes to invest only in a diversified set of fixed income securities with the aim of generating stable returns even over a short period with a low-risk strategy.

IDFC Super Saver Income Fund - Medium Term Plan (IDFC-SSIF-MT) : The Scheme proposes to invest only in a diversified set of fixed income securities with the aim of generating stable medium-term returns with a low-risk strategy. The domestic debt markets are maturing rapidly with liquidity emerging in various debt segments through the introduction of new instruments and investors. The aim of the Investment Manager will be to allocate the assets of the Scheme between various fixed income securities with the objective of achieving consistent returns. The actual percentage of investment in various fixed income securities will be decided after considering the prevailing political conditions, the economic environment (including interest rates and inflation), the performance of the corporate sector and general liquidity as well as other considerations in the economy and markets. The Fund has put in place a detailed Investment Discretion Guidelines defining the prudential and concentration limits for the portfolio and setting dealer limits. The investment management team is allowed full discretion to make sale and purchase decisions within the limits established. For individual transactions dealer limits apply and the maximum limit rests with the Managing Director. The Compliance Officer tracks that limits are not violated on an ongoing basis. The Fund Manager records a justification for investments made, on the deal slip. The Investment Management Committee in its periodic meetings tracks portfolio investment rationale, portfolio composition, performance and limits. Any modifications to the Investment Discretion Guidelines can be made by the IMC and is ratified by the Board. The performance of the fund is monitored against its peer group in the industry and presented at every Board meeting along with the portfolio of the schemes. The Board of Directors discusses the performance and the portfolio composition of the Schemes and queries are responded to by the Managing Director.

IDFC Cash Fund (IDFC-CF) : The domestic debt markets are maturing rapidly with liquidity emerging in various debt segments through the introduction of new instruments and investors. The aim of the Investment Manager will be to allocate the assets of the Scheme between various money market and fixed income securities with the objective of achieving stable returns with a highly liquid portfolio. The actual percentage of investment in various fixed income securities will be decided after considering the prevailing political conditions, the economic environment (including interest rates and inflation), the performance of the corporate sector and general liquidity and other considerations in the economy and markets. The Fund has put in place a detailed Investment Discretion Guideline defining the prudential and concentration limits for the portfolio and setting dealer limits. The investment management team is allowed full discretion to make sale and purchase decisions within the limits established. For individual transactions dealer limits apply and the maximum limit rests with the Managing Director. The Compliance Officer tracks that limits are not violated on an ongoing basis. The Fund Manager records a justification for investments made, on the deal slip. The Investment Management Committee in its periodic meetings tracks portfolio investment rationale, portfolio composition, performance and limits. Any modifications to the Investment Discretion Guidelines can be made by the IMC and is ratified by the Board. The performance of the fund is monitored against its peer group in the industry and presented at every Board meeting along with the portfolio of the schemes. The Board of directors discusses the performance of and portfolio composition and queries are responded to by the Managing director.

IDFC Imperial Equity Fund (IDFC-IEF) : Equity : The scheme will invest in well-managed growth companies that are available at reasonable value. Companies would be identified through a systematic process of forecasting earnings based on a deep understanding of

the industry growth potential and interaction with company management to access the company's core competencies to achieve long-term sustainable profit growth. The Scheme is expected to deliver superior relative returns for investors looking for a focused aggressive portfolio of fundamentally good businesses. The guiding principles while managing the portfolio are summarized below: 1) Sustainable company profits drives long term share value Fund management would focus primarily on business fundamentals of the underlying company. The Equity Research process will endeavor to acquire a robust understanding of the dynamics of the underlying business. This would form the basis for forecasts on future profitability and sustainability of cash profit growth. Stock prices of companies that can sustain periods of high cash profit growth will outperform the markets over the long term. Investors entering this scheme are therefore expected to have at least a one year time horizon. 2) Acquire stocks at reasonable value Once good businesses are identified, stocks would be acquired when they are available at a reasonable value. Overall market corrections and stock price falls due to temporary factors that don't affect long-term profitability are an excellent opportunity to buy stocks cheap. 3) Monitor market interest to ensure consistent performance Systematically tracking over stock ownership and over researched sectors would help to reduce the risk of a sudden sell off. Stock prices react to event triggers that are constantly monitored to ensure that portfolio performance is more consistent.

Debt : The domestic debt markets are maturing rapidly with liquidity emerging in various debt segments through the introduction of new instruments and investors. The actual percentage of investment in various fixed income securities will be decided after considering the prevailing political conditions, the economic environment (including interest rates and inflation), the performance of the corporate sector and general liquidity and other considerations in the economy and markets. The Fund has put in place detailed Investment Discretion Guidelines defining the prudential and concentration limits for the portfolio limits. The investment IDFC Imperial Equity Fund 25 management team is allowed full discretion to make sale and purchase decisions within the limits established. The Fund Manager/ (s) record a justification for investments made, on the deal slip Investment Management Committee (IMC) in its periodic meetings will track portfolio investment rationale, portfolio composition, performance etc. Any modifications to the Investment Discretion Guidelines can be made by the IMC and will be ratified by the Board. The performance of the fund will be monitored against its peer group in the industry and presented at every Board meeting along with the portfolio of the Schemes. The Board of Directors discusses the performance and portfolio composition of the scheme and queries will be responded to by the Managing Director.

IDFC Premier Equity Fund (IDFC-PEF) : The scheme will endeavor to invest in well managed sustainable businesses whose shares are available at reasonable value through a process of disciplined research. The portfolio will aim to provide part ownership to investors in some of the best run companies in India. The portfolio of securities will be well diversified across sectors, so identified, to mitigate overall risk. As the scheme is expected to be part of the core long-term equity holdings of our investors, we will adopt a well-balanced and prudent style of fund management that will endeavor to deliver good returns at controlled levels of risk. The guiding principles while managing the portfolio are summarized below: 1) Stock prices are directly correlated to company profits over the medium to long term Fund management would focus primarily on business fundamentals of the underlying company. The Equity Research process will endeavor to acquire a robust understanding of the dynamics of the underlying business. This would form the basis for forecasts on future profitability and sustainability of cash profit growth. Stock prices of companies that can sustain periods of high cash profit growth will outperform the markets over the long term. Investors entering this scheme are therefore expected to have at least a 2-3 year time horizon. 2) Margin of Safety The fund managers will look to build a "margin of safety" while making forecasts on business profitability. "Margin of safety" will also be the guiding principle while evaluating a company's current market price. The portfolio would also be protected from company specific risks by constantly monitoring the economic and business environment and changes in management strategy. 3) Acquire stocks only at reasonable value Once good businesses are identified, stocks would be acquired when they are available at a reasonable value. Overall market corrections and stock price falls due to temporary factors that don't affect long-term profitability are an excellent opportunity to buy stocks cheap. 4) Stay fully invested over most periods The Fund will not try to profit by predicting overall market direction based on technical indicators or momentum. The Fund will stay fully invested in equities to give investors the full advantage of a rise in the markets that is inevitable given the current trajectory India's GDP growth. The scheme may however hold cash up to 35% during periods where in the view of the fund manager the market valuations have run ahead of its fundamentals or when we are unable to identify stocks at a reasonable value. The scheme may also hold cash to meet anticipated redemptions or to tide over temporary adverse market developments.

Debt : The domestic debt markets are maturing rapidly with liquidity emerging in various debt segments through the introduction of new instruments and investors. The actual percentage of investment in various fixed income securities will be decided after considering the prevailing political conditions, the economic environment (including interest rates and inflation), the performance of the corporate sector and general liquidity and other considerations in the economy and markets. The Fund has put in place detailed Investment Discretion Guidelines defining the prudential and concentration limits for the portfolio limits. The investment management team is allowed full discretion to make sale and purchase decisions within the limits established. The Fund Manager/ (s) record a justification for investments made, on the deal slip Investment Management Committee (IMC) in its periodic meetings will track portfolio investment rationale, portfolio composition, performance etc. Any modifications to the Investment Discretion Guidelines can be made by the IMC and will be ratified by the Board. The performance of the fund will be monitored against its peer group in the industry and presented at every Board meeting along with the portfolio of the Schemes. The Board of Directors would discuss the performance and portfolio composition of the scheme. Any queries will be responded to by the Managing Director.

IDFC Tax Advantage (ELSS) Fund (IDFC-TA(ELSS)F) : Equity : The Scheme will invest in well-managed growth companies that are available at reasonable value. Companies would be identified through a systematic process of forecasting earnings based on a deep understanding of the industry growth potential and interaction with company management to access the company's core competencies to achieve long-term sustainable profit growth. The Scheme is expected to deliver superior relative returns for investors looking for a focused aggressive portfolio of fundamentally good businesses. The guiding principles while managing the portfolio are summarized below : 1) Sustainable company profits drives long term share value Fund management would focus primarily on business fundamentals of the underlying company. The Equity Research process will endeavor to acquire a robust understanding of the dynamics of the underlying business. This would form the basis for forecasts on future profitability and sustainability of cash profit growth. Stock prices of companies that can sustain periods of high cash profit growth will outperform the markets over the long term. Investors entering this scheme are therefore expected to have at least a one year time horizon. 2) Acquire stocks at reasonable value Once good businesses are identified, stocks would be acquired when they are available at a reasonable value. Overall market corrections and stock price falls due to temporary factors that don't affect long-term profitability are an excellent opportunity to buy stocks cheap. 3) Monitor market interest to ensure consistent performance Systematically tracking over stock ownership and over researched sectors would help to reduce the risk of a sudden sell off. Stock prices react to event triggers that are constantly monitored to ensure that portfolio performance is more consistent.

Debt : The domestic debt markets are maturing rapidly with liquidity emerging in various debt segments through the introduction of new instruments and investors. The actual percentage of investment in various fixed income securities will be decided after considering the prevailing political conditions, the economic environment (including interest rates and inflation), the performance of the corporate sector and general liquidity and other considerations in the economy and markets. The Fund has put in place detailed Investment Discretion Guidelines defining the prudential and concentration limits for the portfolio limits. The investment management team is allowed full discretion to make sale and purchase decisions within the limits established. The Fund Manager/ (s) record a justification for investments made, on the deal slip. Investment Management Committee (IMC) in its periodic meetings will track portfolio investment rationale, portfolio composition, performance etc. Any modifications to the Investment Discretion Guidelines can be made by the IMC and will be ratified by the Board. The performance of the fund will be monitored against its peer group in the industry and presented at every Board meeting along with the portfolio of the Schemes. The Board of Directors discusses the performance and portfolio composition of the scheme and queries will be responded to by the Managing Director.

IDFC India GDP Growth Fund (IDFC-IGDPGF) : The fund endeavors to invest its assets under management (AUM) in the sectors representing the three components of the India GDP i.e. Agriculture, Industry and Services in proportion to their contribution to the overall GDP Growth. The investment strategy followed by the fund will enable it to closely replicate the India growth Story. The weights in the portfolio are based on initial estimates of GDP component growth which may be revised later during the year on account of the changing macroeconomic conditions. The fund will in that case seek to rebalance the portfolio in line with the revised weights. The portfolio rebalancing will be done to realign it in accordance to the GDP growth estimates for the year. The expected growth estimates of the GDP are available from govt institutions, research institutions, industry associations, economic think tanks and multilateral Agencies At the macro level the fund will have three levels – Agriculture, Services and Industry. The AUM will be allocated in the three levels in the same proportion as their contribution to the overall GDP growth, in line with the objective of the fund. Please refer to the illustration. All existing sectors will be benchmarked to one of these three industry levels. The Fund manager will have the discretion to pick up sectors within the three levels of GDP (Agriculture, Services and Industry) and stocks within the sector. The fund structure allows it to be a core part of an investor portfolio as the portfolio will be invested in the drivers of GDP broadly in similar proportion of their contribution to the GDP growth. This portfolio is a dynamic structure portfolio aiming to capture the facets of the growth of the India Economy.

IDFC All Seasons Bond Fund (IDFC-ASBF) : IDFC-ASBF an open ended Fund of Funds scheme is designed to help investors create a basket of funds which are rebalanced on a periodical basis for achieving benefits of diversification across various fixed income asset classes and across schemes within an asset class. Funds will be allocated across the basket of debt schemes, depending on the fund manager's view on interest rates. Looking at opportunities in the overseas markets and keeping in view the exchange rates, the fund manager may identify opportunities in overseas mutual funds for investment as may be permitted by regulation from time to time. The fund manager may therefore decide to invest in debt/fixed income schemes (domestic and overseas) of varying average maturities to achieve portfolio diversification and optimum returns. Interest rates like any other asset market, moves in cycles. While investors gain during times of declining interest rates as bond prices rise, the inverse is true in a rising interest rate environment. The investment objective of this scheme is to optimize returns to the investor by designing a portfolio that will dynamically track interest rate movements by investing in schemes with a low duration in a rising rate environment and by investing in high duration in a falling interest rate environment. This will be achieved by actively churning the portfolio in such a manner that we capture as much of the positive price movements within prudent risk measures and will endeavour to minimize negative price movements.

Debt : The domestic debt markets are maturing rapidly with liquidity emerging in various debt segments through the introduction of new instruments and investors. The actual percentage of investment in various fixed income securities will be decided after considering the prevailing political conditions, the economic environment (including interest rates and inflation), the performance of the corporate sector and general liquidity and other considerations in the economy and markets. The Fund has put in place detailed Investment Discretion Guidelines defining the prudential and concentration limits for the portfolio limits. The investment management team is allowed full discretion to make sale and purchase decisions within the limits established. The Fund Manager/ (s) record a justification for investments made, on the deal slip Investment Management Committee (IMC) in its periodic meetings will track portfolio investment rationale, portfolio composition, performance etc. Any modifications to the Investment Discretion Guidelines can be made by the IMC and will be ratified by the Board. The performance of the fund will be monitored against its peer group in the industry and presented at every Board meeting along with the portfolio of the Schemes. The Board of Directors discusses the performance and portfolio composition of the scheme and queries will be responded to by the Managing Director.

IDFC Sterling Equity Fund (IDFC-SEF) : The scheme will invest in well-managed growth companies that are available at reasonable value. Companies would be identified through a systematic process of forecasting earnings based on a understanding of the industry growth potential and interaction with company management to access the company's core competencies to achieve long-term sustainable profit growth. The scheme would predominantly create a portfolio of emerging business and companies that are aspiring leaders in their respective field of operations. Some part of the portfolio would be in stocks/ companies that do not have a significant history of being listed. The Scheme is expected to deliver returns for investors looking for a focused aggressive portfolio of fundamentally good businesses.

IDFC Ultra Short Term Fund (IDFC-USTF) : The domestic debt markets are maturing rapidly with liquidity emerging in various debt segments through the introduction of new instruments and investors. The aim of the Investment Manager will be to allocate the assets of the Scheme between various money market and fixed income securities with the objective of providing liquidity and achieving optimal returns with the surplus funds. The actual percentage of investment in various money market and other fixed income securities will be decided after considering the prevailing political conditions, the economic environment (including interest rates and inflation), the performance of the corporate sector and general liquidity and other considerations in the economy and markets. The Fund has put in place detailed Investment Discretion Guidelines defining the prudential and concentration limits for the portfolio. The Compliance Officer tracks that limits are not violated on an ongoing basis. The Fund Manager/ (s) record a justification for investments made, on the deal slip. The Investment Management Committee (IMC) which includes the Managing Director of the Company, in its periodic meetings tracks portfolio investment rationale, portfolio composition, performance and limits. Any modifications to the Investment Discretion Guidelines can be made by the IMC and is ratified by the Board. The performance of the fund is monitored against its peer group in the industry and presented at every Board meeting along with the portfolio of the Schemes. The Board of Directors discusses the performance and portfolio composition of the scheme and queries are responded to by the Managing Director.

IDFC Government Securities Fund - Investment Plan, Short Term Plan & Provident Fund Plan (IDFC-GSF-IP), (IDFC-GSF-ST) & (IDFC-GSF-PF) : The domestic debt markets are maturing rapidly with liquidity emerging in various debt segments through the introduction of new instruments and investors. The aim of the Investment Manager will be to allocate the assets of the Scheme between various treasury bills or money at call and short notice and gilt securities with the objective of achieving optimal returns with a highly liquid portfolio. The actual percentage of investment in various gilt securities will be decided after considering the prevailing political conditions, the economic environment (including interest rates and inflation), the performance of the corporate sector and general liquidity and other considerations in the economy and markets. The Fund has put in place detailed Investment Discretion Guidelines defining the prudential and concentration limits for the portfolio and setting dealer limits. The investment management team is allowed full discretion to make sale and purchase decisions within the limits established. For individual transactions dealer limits apply and the maximum limit rests with the Managing Director. The Compliance Officer tracks that limits are not violated on an ongoing basis. The Fund Manager/ (s) record a justification for investments made, on the deal slip. The Investment Management Committee (IMC) in its periodic meetings tracks portfolio investment rationale, portfolio composition, performance and limits. Any modifications to the Investment Discretion Guidelines can be made by the IMC and is ratified by the Board. The performance of the fund is monitored against its peer group in the industry and presented at every Board meeting along with the portfolio of the Schemes. The Board of Directors discusses the performance and portfolio composition of the scheme and queries are responded to by the Managing Director.

IDFC Money Manager Fund - Investment Plan & Treasury Plan (IDFC-MMF-IP) & (IDFC-MMF-TP) : The Scheme proposes to invest substantially in floating interest rate securities, fixed interest rate securities swapped for floating rate returns and fixed rate securities. The

aim of the investment strategy is to generate stable returns both in the short term and the long term with a low risk, particularly minimal interest rate risk strategy. The domestic debt markets are maturing rapidly with liquidity emerging in various debt segments through the introduction of new instruments and investors. The development of the derivatives markets, particularly swaps and Forward Rate Agreements (FRAs) have made the environment more dynamic and have provided the opportunity to manage interest rate more actively. The aim of the investment manager will be to allocate the assets of the Scheme between various fixed interest rate securities and floating interest rate securities and use derivatives like swaps and FRAs effectively with the objective of achieving stable returns. The Scheme will endeavour to minimise interest rate risk. Fixed interest rate securities are subjected to volatility in price movements corresponding to movements in interest rates. However, the interest rate in the case of floating rate securities is reset at regular time intervals based on certain benchmarks (eg. NSE, MIBOR, etc.). Hence, the prices of these securities are less sensitive to interest rate fluctuation. Therefore, the interest rate risk is minimal in the case of floating interest rate securities. The floating interest rate securities market in India is in a developing phase. The Government of India has started issuing Government Securities carrying floating rate coupon payments. This will help the floating rate market to develop rapidly. A large number of corporates borrow their short term requirements and funds through floating rate instruments. However, as the markets develop, corporates would start accessing the market for their long term requirement of funds at a floating rate. In the absence of floating rate securities, the same can be created synthetically with a combination of derivatives like Interest Rate Swaps and FRAs and fixed interest rate securities. The fixed income derivatives market has developed considerably during the last 2 years in India. The Scheme intends to use derivatives as permitted by RBI/SEBI for hedging interest rate risk. The actual percentage of investments in various floating and fixed interest rate securities and the position of derivatives will be decided after considering the prevailing political conditions, economic environment (including interest rates and inflation), the performance of the corporate sector and general liquidity as well as other considerations in the economy and markets. The Fund has put in place detailed Investment Discretion Guidelines defining the prudential and concentration limits for the portfolio and setting dealer limits. The investment management team is allowed full discretion to make sale and purchase decisions within the limits established. For individual transactions, dealer limits apply and the maximum limit rests with the Managing Director. The Compliance Officer tracks that limits are not violated on an ongoing basis. The Fund Manager/ (s) record a justification for investments made, on the deal slip. The Investment Management Committee (IMC) in its periodic meetings tracks the portfolio, the investment rationale, the portfolio composition, the performance and limits. Any modifications to the Investment Discretion Guidelines can be made by the IMC and is ratified by the Board. The performance of the fund is monitored against its peer group in the industry and presented at every Board meeting alongwith the portfolio of the Schemes. The Board of directors discusses the performance of and portfolio composition and queries are responded to by the Managing Director.

IDFC Dynamic Bond Fund (IDFC-DBF) : The management of this scheme will be different from a long term debt fund in the sense that here we will look to micro manage the portfolio in such a manner that we are able to maximise returns in the short term while long term debt funds look to optimise returns over the long term. In order to maximise returns the fund managers may look at curve spreads both on the gilt as well as the corporate bond markets to gain maximum value out of any security/s. The Asset Management Company is of the opinion that the fund managers are sufficiently equipped to identify opportunities in the overseas asset markets as may be permitted by regulations from time to time.

IDFC Equity Fund (IDFC-EF) : The term 'Enterprise' connotes activity, venture, project or an endeavour. The Scheme intends to invest in companies which are involved in or are in the process of setting up various business activities, ventures, projects or other commercial endeavours. The Scheme would invest in equities in the IPOs, subsequent public offers or in the secondary market, other equity related instruments (including derivatives), benefit out of the cash and derivative markets arbitrage opportunity and invest the residual sums in debt and money market instruments.

The Scheme will endeavour to generate capital appreciation through investing in equities and equity related instruments by inter alia adopting the mode of applying for Initial Public Offerings (IPOs) or subsequent public offerings made by companies. The Scheme envisages to generate reasonable returns by investing in such equities.

In the event of there not being any well priced IPOs from companies with proven track record / potential growth opportunities etc., the monies collected could be deployed in equities and equity related instruments, cash futures arbitrage, NIFTY spot futures arbitrage etc. Debt and money market instruments could be considered when yields are comparable to those in the spot futures arbitrage segment. The asset allocation would inter-alia depend on various parameters like the availability of initial or subsequent Public Offerings made by the companies, the response to the issue and relative valuations of the peer group of business that the company/ies are operating in, opportunities available in the equity, derivatives, debt markets etc.

IDFC Monthly Income Plan (IDFC-MIP) : The primary objective of Scheme is to generate regular returns through investment primarily in debt and money market Instruments. The secondary objective of the Scheme is to generate long-term capital appreciation by investing a portion of the Scheme's assets in equity and equity related instruments.

Equity Investments : The scheme will endeavour to invest in well managed sustainable businesses whose shares are available at reasonable value through a process of disciplined research. The portfolio will aim to provide part ownership to investors in some of the best run companies in India. The portfolio of securities will be well diversified across sectors, so identified, to mitigate overall risk. As the scheme is expected to be part of the core long-term holdings of our investors, we will adopt a well-balanced and prudent style of fund management that will endeavor to deliver good returns at controlled levels of risk. The guiding principles while managing the portfolio are summarized below:

1) Stock prices are directly correlated to company profits over the medium to long term

Fund management would focus primarily on business fundamentals of the underlying company. The Equity Research process will endeavor to acquire a robust understanding of the dynamics of the underlying business. This would form the basis for forecasts on future profitability and sustainability of cash profit growth. Stock prices of companies that can sustain periods of high cash profit growth will outperform the markets over the long term. Investors entering this scheme are therefore expected to have at least a 2-3 year time horizon.

2) Margin of Safety

The fund managers will look to build a "margin of safety" while making forecasts on business profitability. "Margin of safety" will also be the guiding principle while evaluating a company's current market price. The portfolio would also be protected from company specific risks by constantly monitoring the economic and business environment and changes in management strategy.

3) Acquire stocks only at reasonable value

Once good businesses are identified, stocks would be acquired when they are available at a reasonable value. Overall market corrections and stock price falls due to temporary factors that don't affect long term profitability are an excellent opportunity to buy stocks cheap.

4) Stay fully invested over most periods

The Fund will not try to profit by predicting overall market direction based on technical indicators or momentum. The Fund will stay fully invested in equities to give investors the full advantage of a rise in the markets that is inevitable given the current trajectory India's GDP growth. The scheme may however hold cash up to 35% during periods where in the view of the fund manager the market valuations have run ahead of its fundamentals or when we are unable to identify stocks at a reasonable value. The scheme may also hold cash to meet anticipated redemptions or to tide over temporary adverse market developments.

Debt investments: The Scheme will retain the flexibility to invest in the entire range of debt instruments and money market instruments (including securitised debt). Investment in Debt securities and Money Market Instruments will be as per the limits in the asset allocation table of the Scheme, subject to permissible limits laid under SEBI (MF) Regulations.

The domestic debt markets are maturing rapidly with liquidity emerging in various debt segments through the introduction of new instruments and investors. The actual percentage of investment in various fixed income securities will be decided after considering the prevailing political conditions, the economic environment (including interest rates and inflation), the performance of the corporate sector and general liquidity and other considerations in the economy and markets. The Fund has put in place detailed Investment Discretion Guidelines defining the prudential and concentration limits for the portfolio limits. The investment management team is allowed full discretion to make sale and purchase decisions within the limits established. The Fund Manager/ (s) record a justification for investments made, on the deal slip

IDFC AA FoF (CP, MP, AP) : The scheme will be a Fund of Fund scheme that can invest in a mix of ETFs, domestic and offshore Mutual Fund schemes. The FoF will use a multi-manager approach and can invest in schemes of IDFC MF as well as other mutual funds. The scheme will offer 3 different plans - Conservative Asset Allocation plan (Conservative AA Plan), Moderate Asset Allocation plan (Moderate AA Plan) and Aggressive Asset Allocation plan (Aggressive AA plan) that will offer 3 different risk profiles for investors. Conservative AA Plan will target the lowest risk profile followed by Moderate AA Plan. Aggressive AA will be the highest risk profile asset allocation.

The strategy seeks to combine benefits of asset allocation and manager diversification in a single product. Asset allocation allows investors to improve their risk adjusted returns as different asset classes such as equity, fixed income and commodities offer lower correlations with each other. Multi-manager approach is expected to diversify allocation to different managers in order to reduce performance risk of any individual manager on the scheme. Additionally FoFs give fund manager the flexibility of tailoring portfolios by participating in funds with different styles within each asset class and to easily switch styles depending on the view of the markets. For example within the overall debt allocation of the scheme, the fund manager can invest in schemes with different maturity profiles – medium term or long term. Similarly the equity allocation can be divided into mid cap and large cap schemes.

The primary objective of Scheme is to generate capital appreciation through investment in different mutual fund schemes based on a defined asset allocation model covering both local and offshore assets.

- The shortlist will be created in two steps: First from the universe of local fund managers, a shortlist of qualifying fund managers will be selected whose schemes will be taken up for detailed review. The selection of mutual funds will be based on the quality of sponsors, stability of business, assets under management and performance across different asset classes. Secondly from the short-listed fund managers, the fund manager will carry out a review of different schemes in each asset class that have investment philosophy in line with the scheme's objectives and that are open for subscription. The fund manager will shortlist a series of schemes based on parameters such as performance of the scheme, investment objectives, investment strategy and assets under management. The list will also include ETFs wherever available. Higher consideration will be given for stable performance over medium term than near term out-performance. The shortlist will be reviewed and modified on an on-going basis. Final investments will only be made to schemes that are a part of this shortlist.
- Decide the tactical asset allocation: Within the asset allocations mentioned above, the fund manager can carry out a tactical allocation by underweighting/ overweighting any of the asset classes. This will be based on the view of individual asset market and risk-return considerations. It can also happen on an ongoing basis due to mark-to-market movements in any of the asset classes. The fund will maintain asset allocation within +/- 5% of the target allocation of that portfolio. The scheme can thus be overweight, neutral or underweight in any of the asset classes. The asset allocation will be reviewed on a quarterly basis or in case mark-to-market movements take the allocations to beyond the permissible bands.
- Select schemes from the shortlist to invest: The fund manager will aim to create a portfolio through investments that are complementary to each other and enables it to diversify. The portfolio will be multi-manager in nature i.e. it will look to invest in schemes from different sponsors. The fund will select schemes from its shortlist. Selection of funds will be based on quantitative and qualitative factors. The fund manager will have detailed discussions with each of the short-listed fund managers to understand their fund management approach. The quantitative factors considered by the fund manager will include risk-adjusted return, information ratio and stability of performance relative to peer group.
- Monitor performance of funds :The fund manager will carry out detailed on-going review of the short-listed schemes and fund managers. This will include meetings with the fund managers to understand the background to their performance and to understand their portfolio positioning. The scheme will target stable allocations to fund managers that are offering consistency in performance with respect to benchmark and peer groups.

IDFC Nifty Fund (IDFC-NF) :

Equity : The Scheme will be managed passively with investments in stocks in a proportion that it is as close as possible to the weightages of these stocks in the S&P CNX Nifty Index. The investment strategy would revolve around reducing the tracking error to the least possible through rebalancing of the portfolio, taking into account the change in weights of stocks in the index as well as the incremental collections/redemptions from the Scheme. It is proposed to manage the risks by placing limit orders for basket trades and other trades, proactive follow-up with the service providers for daily change in weights in the S&P CNX Nifty Index as well as monitor daily inflows and outflows to and from the Fund closely. While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.

Debt : The domestic debt markets are maturing rapidly with liquidity emerging in various debt segments through the introduction of new instruments and investors. The actual percentage of investment in various fixed income securities will be decided after considering the prevailing political conditions, the economic environment (including interest rates and inflation), the performance of the corporate sector and general liquidity and other considerations in the economy and markets. The Fund has put in place detailed Investment Discretion Guidelines defining the prudential and concentration limits for the portfolio limits. The investment management team is allowed full discretion to make sale and purchase decisions within the limits established. The Fund Manager/ (s) record a justification for investments made, on the deal slip / instruction. Investment Management Committee (IMC) in its periodic meetings will track portfolio investment rationale, portfolio composition, performance etc. Any modifications to the Investment Discretion Guidelines can be made by the IMC and will be ratified by the Board. The performance of the fund will be monitored against its peer group in the industry and presented at every Board meeting along with the portfolio of the Schemes. The Board of Director discusses the performance and portfolio composition of the scheme and queries are responded to by the President & CEO.

IDFC Infrastructure Fund (IDFC IF) :

The Fund shall invest primarily in infrastructure sectors. Infrastructure sectors encompass a wide range of industries and include without limitation, the following:

- Power and Utilities - generation, transmission, trading and distribution of power.
- Oil and Gas - (a) petroleum and natural gas, including exploration and production, import terminals, liquefaction, regasification, storage terminals, transmission networks and distribution networks and (b) development of technology and production of renewable energy of fuels,

- Ferrous and non-ferrous metals, including mining, production and distribution,
- Transportation - (a) roads, including toll roads, rural roads, bridges, highways, road transport providers and other road-related services, (b) rail system, rail transport providers and other railway-related services, (c) ports, inland waterways, coastal shipping, including shipping lines, dredging and other port-related services, (d) aviation, including airports, airlines and other airport-related services and (e) distribution/logistics services,
- Telecom - telecommunication services, including radio paging, domestic satellite service, network of trunking, cable TV services, broadband network and internet services,
- Industrial and Commercial Infrastructure – (a) urban development including industrial parks, special economic zones, real estate development, water supply, irrigation, water treatment systems, sanitation and sewerage systems and solid waste management systems and (b) tourism including hotels, convention centers and entertainment centers,
- Rural Infrastructure – infrastructure related to agriculture, food distribution, irrigation and rural development and
- Others - (a) development, operation and maintenance of educational institutions and healthcare facilities, (b) technology-related infrastructure, (c) manufacturing of equipments, components and materials or any other utilities or facilities required by the infrastructure sector like energy saving devices and metering devices, etc., (d) environment related infrastructure, (e) capital goods/engineering equipment, (f) financial institutions including banks and housing finance companies (g) building materials and (h) any other types of utilities or facilities or services as may be determined by the Board of the Fund from time to time.

The above list is indicative and the Investment Manager may add such other sectors/ group of industries which broadly satisfy the category of being under Infrastructure Sector or are related to the Infrastructure growth, depending on the relevance of that sector to the investment objective of the scheme.

Investment philosophy

The scheme will invest in well-managed growth companies that are available at reasonable value. Companies would be identified through a systematic process of forecasting earnings based on a deep understanding of the industry growth potential and interaction with company management to access the company's core competencies to achieve long-term sustainable profit growth.

The Scheme is expected to deliver superior relative returns for investors looking for a focused aggressive portfolio of fundamentally good businesses. The guiding principles while managing the portfolio are summarized below:

- 1) Sustainable company profits drives long term share value Fund management would focus primarily on business fundamentals of the underlying company. The Equity Research process will endeavor to acquire a robust understanding of the dynamics of the underlying business. This would form the basis for forecasts on future profitability and sustainability of cash profit growth. Stock prices of companies that can sustain periods of high cash profit growth will outperform the markets over the long term. Investors entering this scheme are therefore expected to have at least a one year time horizon.
- 2) Acquire stocks at reasonable value once good businesses are identified, stocks would be acquired when they are available at a reasonable value. Overall market corrections and stock price falls due to temporary factors that don't affect long-term profitability are an excellent opportunity to buy stocks cheap.
- 3) Monitor market interest to ensure consistent performance Systematically tracking over stock ownership and over researched sectors would help to reduce the risk of a sudden sell off. Stock prices react to event triggers that are constantly monitored to ensure that portfolio performance is more consistent.

ASSET ALLOCATION PATTERN OF THE SCHEME

IDFC-PEF (Plan A & B)

Asset Class	Range of allocation (% of Net Assets)	Risk Profile
Equities & Equity related instruments	65 - 100	Medium to High
Debt & Money Market instruments	0 - 35	Low to Medium
Securitized Debt instruments	0 - 35	Low to Medium

Investments in Derivatives - upto 50% of the net assets of the Scheme

Investments in Securities Lending - upto 35% of the net assets of the Scheme

Investments in Foreign debt instruments - up to 35% of the net assets of the Scheme

Investments in ADRs and GDRs issued by Companies in India / equity of listed overseas companies as permitted by SEBI regulations - upto 50% of the net assets of the scheme.

IDFC-IEF (Plan A & B)

Asset Class	Range of allocation (% of Net Assets)	Risk Profile
Equities & Equity related securities	65 - 100	High
Debt & Money Market instruments	0 - 35	Low to Medium
Securitized debt instruments	0 - 35	Low to Medium

Investments in Derivatives - upto the limits permitted by SEBI Mutual Funds regulations from time to time

Investments in Securities Lending - upto 100% of the equity investments of the Scheme

Investments in Foreign debt instruments - up to 35% of the net assets of the Scheme

Investments in ADRs and GDRs issued by Companies in India / equity of listed overseas companies as permitted by SEBI regulations - upto 50% of the net assets of the scheme.

IDFC-CEF (Plan A & B)

Asset Class	Range of allocation (% of Net Assets)	Risk Profile
Equities & Equity related instruments	65 - 100	Medium to High
Debt & Money Market instruments	0 - 35	Low to Medium
Securitized debt instruments	0 - 35	Low to Medium

Investments in Derivatives - upto 50% of net assets of the scheme

Investments in Securities Lending - upto 35% of the net assets of the Scheme

Investments in Foreign debt instruments - up to 35% of the net assets of the Scheme

Investments in ADRs and GDRs issued by Companies in India / equity of listed overseas companies as permitted by SEBI regulations – upto 50% of the net assets of the scheme.

IDFC-AF

Under Normal circumstances:

Asset Class	Range of allocation (% of Net Assets)	Risk Profile
Equities & Equity related instruments *	65 - 90	Medium to High
Derivatives *	65 - 90	Medium to High
Debt & Money Market instruments including the margin money deployed in derivative transactions	10 - 35	Low

Under Defensive circumstances + :

Asset Class	Range of allocation (% of Net Assets)	Risk Profile
Equities & Equity related instruments *	0 - 35	Medium to High
Derivatives *	0 - 35	Medium to High
Debt & Money Market instruments including the margin money deployed in derivative transactions	65 - 100	Low

+ Defensive circumstances are when the arbitrage opportunities in the market are negligible, in view of the fund manager Investments in securitized debt can be made upto 35% of the portfolio. Investment in derivatives can be made upto 90% of the net assets of the scheme.

Investment in Securities Lending can be made upto 50% of net assets of scheme

Investments in Foreign debt instruments can be made upto 35% of the net assets of the Scheme

Investments in ADRs and GDRs issued by Companies in India, as permitted by SEBI regulations - upto 50% of the net assets of the scheme.

IDFC-APF

Under Normal circumstances:

Asset Class	Range of allocation (% of Net Assets)	Risk Profile
Equities & Equity related instruments *	65 - 100	Medium to High
Derivatives *	65 - 100	Medium to High
Debt & Money Market instruments including the margin money deployed in derivative transactions	0 - 35	Low

Under Defensive circumstances + :

Asset Class	Range of allocation (% of Net Assets)	Risk Profile
Equities & Equity related instruments *	0 - 35	Medium to High
Derivatives *	0 - 35	Medium to High
Debt & Money Market instruments including the margin money deployed in derivative transactions	65 - 100	Low

+ Defensive circumstances are when the arbitrage opportunities in the market are negligible, in view of the fund manager

Investments in securitized debt can be made upto 35% of the portfolio.

Investment in derivatives can be made 100% of the net assets of the scheme.

Investment in Securities Lending can be made upto 50% of net assets of scheme

Investments in Foreign debt instruments - up to 35% of the net assets of the Scheme

Investments in ADRs and GDRs issued by Companies in India, as permitted by SEBI regulations - upto 50% of the net assets of the scheme.

*Equity allocation is measured as the Gross exposure to equities, equity related instruments and derivatives. The scheme will enter into equity positions to hedge the investments in derivatives. The derivative positions will be hedged against corresponding positions in either equity or derivative markets depending on the strategies involved and execution costs. On the total portfolio level there will be no short-positions. Unhedged positions in the portfolio (investments in equity shares without corresponding exposure to equity derivative) shall not exceed 5%.

IDFC-SS(50-50)EF (Plan A & B)

Asset Class	Range of allocation (% of Net Assets)	Risk Profile
Equities & Equity related securities of which: Investments in equity and equity related instruments of companies in a chosen sector (sector specific exposure) will be 50% of the total equity and equity related investments of the scheme & Investments in equity and equity related instruments of companies across capitalizations and across sectors (diversified exposure) will be the balance 50% of the total equity and equity related investments in the scheme	65 - 100	High
Debt & Money Market instruments	0 - 35	Low to Medium
Securitized debt instruments	0 - 35	Low to Medium

Investments in Derivatives - upto 100% Investments in Securities Lending - upto 35% of the net assets of the Scheme

Investments in Foreign debt instruments - up to 35% of the net assets of the Scheme.

Investments in ADRs and GDRs issued by Companies in India / equity of listed overseas companies as permitted by SEBI

regulations - upto 50% of the net assets of the scheme.

IDFC-TA(ELSS)F

Asset Class	Range of allocation (% of Net Assets)	Risk Profile
Equities & Equity Related securities	80 - 100	High

Debt Instruments with maturity more than one year	75 - 0	Low to Medium
Debt & Money Market Instruments with maturity less than one year	100 - 25	Low

Investment in Securitized Debt up to 50%.

Investment in Foreign Debt Instruments up to 50%

IDFC-GSF-IP (Plan A & B), IDFC-GSF-ST (Plan A & B) & IDFC-GSF-PF (Plan A & B) *

Instruments	Indicative Allocation (% if total assets)	Risk Profile
Government Securities & Treasury Bills	100 - 0	Low

* All plans of IDFC GSF-PF have the same portfolio

The Scheme may invest in repos / reverse repos in Government Securities and may invest in money at call and short notice or such alternatives as may be provided under applicable regulations for meeting liquidity requirements.

IDFC-DBF (Plan A & B)

Instruments	Indicative Allocation (% if total assets)	Risk Profile
Money Market and Debentures with residual maturity of less than 1 year	100 - 10	Medium to Low
Debt instruments with maturity more than 1 year	90 - 0	Low

Investment in Securitized Debt up to 50%.

Investment in Foreign Debt Instruments up to 50%.

IDFC-MMF-TP (Plans A, B, C, D & F) * & IP (Plans A, B & F) *

Instruments	Indicative Allocation (% if total assets)	Risk Profile
Floating Rate debt instruments (including securitized debt instruments), money market Instruments and fixed rate debt instruments swapped for floating rate returns	100 - 65	Low to Medium

Fixed rate debt instruments 0% to 35% instruments) (including securitized debt Medium and floating rate debt instruments swapped for fixed rate returns

Investment in Securitized Debt up to 50%.

Investment in Foreign Debt Instruments up to 50%.

* All Plans of IDFC-MMF-TP have the same portfolio & all Plans of IDFC-MMF-IP have the same portfolio.

IDFC-CF (Plan A, B, C & F) *

Instruments	Indicative Allocation (% of total assets)	Risk Profile
Money Market Instruments and debt instruments with maturity up to 91 days	100 - 0	Low to Medium

Investment in Securitized Debt upto 50%

Investment in Foreign Debt Instruments upto 50%

* All Plans of IDFC-CF have the same portfolio In case of securities where the principal is to be repaid in a single payout the maturity of the securities shall mean residual maturity.

In case the principal is to be repaid in more than one payout then the maturity of the securities shall be calculated on the basis of weighted average maturity of security.

In case of securities with put and call options (daily or otherwise) the residual maturity of the securities shall not be greater than 91 days.

IDFC-USTF

Instruments	Indicative Allocation (% of total assets)	Risk Profile
Money Market Instruments	100 - 0	Low
Debt Instruments with maturity upto 365 days	75 - 0	Low to Medium
Debt Instruments with maturity between 1-3 years	50 - 0	Low to Medium
Securitized Instruments	25 - 0	Low to Medium

Investments in Derivatives - Upto 50% of Net Assets of the scheme Investment in Securities lending (Stock lending) - Upto 35% of Net Assets of the scheme

Investment in Foreign Debt instruments - Upto 35% of Net Assets of the scheme

In case of securities where the principal is to be repaid in a single payout the maturity of the securities shall mean residual maturity.

In case the principal is to be repaid in more than one payout then the maturity of the securities shall be calculated on the basis of weighted average maturity of security.

In case of securities with put and call options (daily or otherwise) the residual maturity of the securities shall not be greater than 91 days.

IDFC-EF

Instruments	Indicative Allocation (% of total assets)	Risk Profile
Equities & Equity related instruments	65 - 100	High
Debt & Money Market instruments	0 - 35	Low to Medium
Securitized debt instruments	0 - 35	Low to Medium

Investments in Derivatives - upto the limits permitted by SEBI Mutual Funds regulations from time to time.

Investments in Securities Lending - upto 100% of Equity investments in the Scheme.

Investments in Foreign debt instruments - up to 35% of the net assets of the Scheme

Investments in ADRs and GDRs issued by Companies in India / equity of listed overseas companies as permitted by SEBI regulations – upto 75% of the net assets of the scheme.

IDFC-MIP :

Instruments	Indicative Allocation (% of total assets)	Risk Profile
Equity Securities	0-25%	Medium to High
Debt Securities (Including securitized debt) and Money market Instruments	75-100%	Low to Medium

IDFC AA FoF: (CP, MP, AP)

The asset allocation under the scheme will be as follows:

Conservative AA Plan:		
Instruments	Indicative Allocation (% of total assets)	Risk Profile
Equity (Including Offshore Equity) Fund	10-15%	Low to Medium
Debt Fund (Including Liquid funds)	0-90%	Medium
Alternate (Including Gold/ Commodity Equity Funds)	0%	-
Money Market Securities	0-15%	Low
Moderate AA Plan:		
Equity (Including Offshore Equity) Fund	25-30%	Low to Medium
Debt Fund (Including Liquid funds)	0-70%	Medium
Alternate (Including Gold/ Commodity Equity Funds)	5-10%	Low to medium
Money Market Securities	0-15%	Low
Aggressive AA Plan:		
Equity (Including Offshore Equity) Fund	45-50%	Medium to High
Debt Fund (Including Liquid funds)	0-45%	Medium
Alternate (Including Gold/ Commodity Equity Funds)	10-15%	Low to medium
Money Market Securities	0-15%	Low

Asset class explanation:

1) **Equity Funds** - It will primarily consist of allocations to local equity funds/ ETFs/ Index funds. There can also be a small allocation (0-5% of net assets) to offshore emerging market equity funds, depending on the quantum of allocation to equity and the positioning of the fund. Within active local equity funds the allocation can be to large cap, diversified, thematic or mid cap strategies.

2) **Debt Funds and Liquid Funds** - It will consist of allocation to local debt funds and liquid funds with different maturity profile (including Gilt funds). The two key categories to which allocations will be made will be short maturity funds (0-5 year maturity) and long maturity funds.

3) **Alternate** - It will consist of allocations to offshore commodity equity funds as well as domestic Gold ETFs.. Offshore commodity equity funds are funds that would invest in securities of companies that deal in commodities/commodities related activities. Currently the scheme can invest in Gold ETF/ Equity ETF's only.

The scheme shall invest in equity ETF's upto 30% of the net assets and 50% of the net assets in Moderate AA Plan and Aggressive AA Plan respectively. Further, the scheme shall invest in gold ETF upto 10% and 15% of the net assets in Moderate AA Plan and Aggressive AA plan respectively. Under the Conservative AA Plan the scheme shall invest upto 15% of the net assets in Equity ETF's. Investments in offshore funds i.e foreign securities, ADR's and GDR's shall be in compliance with the requirement of SEBI circular dated September 26, 2007.

IDFC NF

Instruments	Indicative Allocation (% of total assets)	Risk Profile
Securities (including derivatives) forming a part of the S&P CNX Nifty Index	90 - 100	High
Debt & Money Market instruments	0 - 10	Low - Medium

The net assets of the scheme/Plan will be invested predominantly in stocks constituting the S&P CNX Nifty and / or in exchange traded derivatives on the S&P CNX Nifty. This would be done by investing in almost all the stocks comprising the S&P CNX Nifty Index in approximately the same weightage that they represent in the S&P CNX Nifty Index and / or investing in derivatives including futures contracts and options contracts on the S&P CNX Nifty Index. A small portion of the net assets will be invested in money market instruments permitted by SEBI / RBI including call money market or in alternative investment for the call money market as may be provided by the RBI, to meet the liquidity requirements of the scheme/plan and for meeting margin money requirement for Nifty futures and/or futures of stocks forming part of the Nifty Index. Further in case wherein the minimum lot size of the index scrip's is not available, then the scheme shall invest in debt and money market instruments. Further in case wherein the minimum lot size of the index scrip's is not available, then the scheme shall invest in debt and money market instruments.

Investments in Derivatives - upto 50% of the net assets of the scheme.

IDFC IF

Instruments	Indicative Allocation (% of total assets)	Risk Profile
Equities & Equity related securities in companies engaged in infrastructural and infrastructural related activities	80 - 100	High
Debt, & Money Market instruments	0 - 20	Low to Medium

Investment in derivatives shall be purpose of hedging and portfolio balancing only. Investments in derivatives - upto 50% of the net assets of the scheme.

The total exposure to equity, debt and derivative positions on a gross basis will not exceed 100% of the net assets of the scheme.

Investment in Securitised debt - Nil

Investments in Securities Lending - upto 35% of the net assets of the Scheme

Investments in ADRs and GDRs issued by Companies in India and foreign securities as permitted by SEBI regulations - upto 50% of the net assets of the scheme.

Investments in foreign securities shall be in compliance with the requirement of SEBI circular dated September 26, 2007

The net assets of the scheme will be invested predominantly in infrastructure stocks that forms a part of CNX Infrastructure Index (not necessarily in the same weightage of the index) or such other companies that forms a part of "Infrastructure companies" as defined in the Scheme Information Document. A small portion of the net assets will be invested in money market instruments permitted by SEBI / RBI including call money market or in alternative investment for the call money market as may be provided by the RBI, to meet the liquidity requirements of the scheme/plan. As the scheme invests in a dedicated sector, the upper ceiling on investments may be in accordance with the weightage of the scrips in the representative sectoral index or 10% of the NAV of the scheme whichever is higher.

RISK FACTORS

Mutual Fund investments are subject to market risks. Please read the offer document carefully for details on risk factors before investment.

Scheme Specific Risk Factors for Equity Schemes : IDFC-CEF, IDFC-IEF, IDFC-PEF, IDFC-SEF, IDFC-EF, IDFC-AF, IDFC-APF, IDFC-SS (50-50) EF, IDFC-TA (ELSS), IDFC-IGGF, IDFC-NF, IDFC-IF.

The scheme proposes to invest in equity and equity related instruments. Equity instruments by nature are volatile and prone to price fluctuations on a daily basis due to both micro and macro factors. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities' purchases due to settlement problems could cause the Scheme to miss certain investment opportunities.

Price-Risk or Interest-Rate Risk: Fixed income securities such as bonds, debentures and money market instruments run price risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.

Reinvestment Risk: Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

Credit Risk: In simple terms this risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government securities, there is no credit risk to that extent. Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AAA rated, are comparatively less risky than bonds which are AA rated.

Basis Risk (Interest - rate movement): During the life of a floating rate security or a swap, the underlying benchmark index may become less active and may not capture the actual movement in interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio.

Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. However, depending upon the market conditions, the spreads may move adversely or favourably leading to fluctuation in the NAV.

Liquidity Risk: Due to the evolving nature of the floating rate market, there may be an increased risk of liquidity risk in the portfolio from time to time.

Other Risk: In case of downward movement of interest rates, floating rate debt instruments will give a lower return than fixed rate debt instruments.

Scheme Specific Risk Factors for Debt & Liquid Schemes : IDFC-SSIF-ST, IDFC-SSIF MT, IDFC-SSIF-IP, IDFC-DBF, IDFC-CF, IDFC-MMF-IP, IDFC-MMF-TP, IDFC-GSF-IP, IDFC GSF-PF, IDFC GSF ST, IDFC MIP, IDFC-USTF, IDFC ASBF.

Basis Risk (Interest - rate movement): During the life of a floating rate security or a swap, the underlying benchmark index may become less active and may not capture the actual movement in interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio.

Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. However, depending upon the market conditions, the spreads may move adversely or favorably leading to fluctuation in the NAV.

Liquidity Risk: Due to the evolving nature of the floating rate market, there may be an increased risk of liquidity risk in the portfolio from time to time.

Other Risk: In case of downward movement of interest rates, floating rate debt instruments will give a lower return than fixed rate debt instruments.

Credit Risk: In simple terms this risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government Securities, there is no credit risk to that extent. Different types of securities in which the scheme would invest as given in the scheme information document carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.

Scheme Specific Risk Factors for IDFC Asset Allocation Fund (AP, MP, CP)

1. The Scheme returns can be impacted by issues pertaining to the NAV's of underlying schemes of mutual funds where the fund has invested. These could be issues such as uncharacteristic performance, changes in the business ownership and / or investment process, key staff departures etc.

2. The returns of the Scheme will depend on the choice of underlying scheme of mutual funds and allocation of capital to underlying scheme by the IDFC Investment Team. An inappropriate decision in either or both may have an adverse impact on the returns of the FoF Scheme.

3. The NAVs of the underlying scheme where the Scheme has invested may be impacted generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in government policies, taxation laws or any other appropriate policies and other political and economic developments. Consequently, the NAV of the Scheme may fluctuate accordingly.

4. Investments in underlying equity schemes will have all the risks associated with the underlying equity schemes including performance of underlying stocks, derivative investments, off shore investments, security lending etc.

5. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the underlying scheme of mutual funds wherein the Scheme has invested. As a result, the time taken by the Mutual Fund for the redemption of units may be significant in the event of a high number of redemption requests or a restructuring of the scheme. In view of the above, the Trustee has a right in its sole discretion, to limit redemptions under certain circumstances as described under the section titled Right to Limit Redemptions mentioned in SAI.

6. The investors will bear the recurring expenses of the Scheme in addition to the expenses of the Underlying Schemes in which Investments are made by the scheme. As a result, the returns that they may obtain may be materially impacted or at times be lower than the returns that investors directly investing in such Schemes may obtain.

7. If the AMC were to charge an Exit load and the underlying schemes do not waive/exempt the Exit Load charged on Investment/redemptions, the investors will incur load charges on two occasions. First, on their investment/redemptions/switches in the options under the Scheme and second, on the Scheme's investment / redemption / switches in the options under the underlying schemes.

8. The tax benefits available to the FoF Scheme(s) are the same as those available under the current taxation laws and subject to relevant conditions. The information given is included for general purposes only and is based on advice that the AMC has received regarding the law and the practice that is currently in force in India. The investors and the unitholders should be aware that the relevant fiscal rules and their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each investor/unitholder is advised to consult his/her own professional tax advisor.

9. There will be no prior intimation or prior indication given to the Unit holders when the composition/ asset allocation pattern under the scheme changes within the broad range defined in this offer document.

10. The scheme specific risk factors of each of the underlying schemes become applicable where a fund of funds invests in any underlying scheme. Investors who intend to invest in Fund of Funds are required to and are deemed to have read and understood the risk factors of the underlying schemes relevant to the Fund of Fund scheme that they invest in.

11. As the investors are incurring expenditure at both the Fund of Funds level and the schemes into which the Fund of Funds invests, the returns that they may obtain may be materially impacted or may at times be lower than the returns that investors directly investing in such schemes obtain.

12. As the Fund of Funds scheme may shift the weightage of investments between schemes into which it invests, the expenses charged being dependent on the structure of the underlying schemes (being different) may lead to a non- uniform charging of expenses over a period of time.

13. As the Fund of Funds (FOF) factsheets and disclosures of portfolio will be limited to providing the particulars of the schemes invested at FOF level, investors may not be able to obtain specific details of the investments of the underlying schemes.

14. The NAV of the scheme to the extent invested in Money market securities, are likely to be affected by changes in the prevailing rates of interest which may affect the value of the Scheme's holdings and thus the value of the Scheme's Units.

15. Investment decisions made by the AMC may not always be profitable.

16. In the event of receipt of an inordinately large number of redemption requests and inability of the Underlying Scheme(s) to generate enough liquidity because of market conditions, there may be delays in redemption of units.

17. While the scheme endeavors to give dividend on a monthly basis, the ability for payment of the same will be dependent on the scheme having distributable surplus. Accordingly investors may not get dividend in certain months in case distributable surplus is not available.

Risk Factors for derivatives

1. **Credit Risk:** The credit risk is the risk that the counter party will default obligations and is generally negligible, as there is no exchange of principal amounts in a derivative transaction (especially in case of debt derivatives).

2. **Market risk:** Derivatives carry the risk of adverse changes in the market price.

3. **Illiquidity risk:** The risk that a derivative cannot be sold or purchased quickly enough at a fair price, due to lack of liquidity in the market.

4. The risk is to the extent that returns are limited for the investor in case of extreme movement in call rates (applicable to debt derivatives)

5. The fund pays the daily compounded rate. In practice however there can be a difference in the actual rate at which money is lent in the call market and the benchmark, which appears and is used (applicable to debt derivatives)

It may be mentioned here that the guidelines issued by the Reserve Bank of India from time to time for forward rate agreements and interest rate swaps and other derivative products would be adhered to.

Risk profile for Debt/Income/Liquid/Fund of fund/Dedicated Gilt Schemes i.e. IDFC Super Saver Income Fund, IDFC Dynamic Bond Fund, IDFC Money Manager Fund, IDFC All Seasons Bond Fund, IDFC Government Securities Fund, IDFC Cash Fund, IDFC Ultra Short Term Fund and IDFC Liquid Fund

• **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.

• **Credit Risk:** In simple terms this risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government securities, there is no credit risk to that extent. Different types of securities in which the scheme would invest as given in the offer document carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AAA rated, are comparatively less risky than bonds which are AA rated.

• **Basis Risk (Interest - rate movement):** During the life of a floating rate security or a swap, the underlying benchmark index may become less active and may not capture the actual movement in interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio.

• **Spread Risk:** In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. However, depending upon the market conditions, the spreads may move adversely or favourably leading to fluctuation in the NAV.

• **Liquidity Risk:** Due to the evolving nature of the floating rate market, there may be an increased risk of liquidity risk in the portfolio from time to time.

• **Other Risk:** In case of downward movement of interest rates, floating rate debt instruments will give a lower return than fixed rate debt instruments.

Risks associated with Investing in Securitised Debt

1. **Credit Risk :** Credit risk forms a vital element in the analysis of securitization transaction. Adequate credit enhancements to cover defaults, even under stress scenarios, mitigates this risk. This is done by evaluating following risks:

• Asset risk • Originator risk • Portfolio risk • Pool risks

2. **Counterparty risk :** There are several counterparties in a securitization transaction, and their performance is crucial. Unlike in the case of credit risks, where the risks emanate from a diversified pool of retail assets, counterparty risks result in either performance or non-performance. The rating agencies generally mitigate such risks through the usage of stringent counterparty selection and replacement criteria to reduce the risk of failure. The risks under this category include:

• Servicer risk • Commingling risk • Miscellaneous other counterparty risks

3. **Legal risks :** The rating agency normally conducts a detailed study of the legal documents to ensure that the investors' interest is not compromised and relevant protection and safeguards are built into the transaction.

4. **Market risks :** Market risks represent risks not directly related to the transaction, but other market related factors, stated below, which could have an impact.

• Macro-economic risks • Prepayment risks • Interest rate risks

5. **Limited Recourse And Credit Risk :** Certificates issued on investment in securitized debt represent a beneficial interest in the underlying receivables and there is no obligation on the issuer, seller or the originator in that regard. Defaults on the underlying loan can adversely affect the pay outs to the investors (i.e. the Schemes) and thereby, adversely affect the NAV of the Scheme. While it is possible to repossess and sell the underlying asset, various factors can delay or prevent repossession and the price obtained on sale of such assets may be low. Housing Loans, Commercial Vehicle loans, Motor car loans, Two wheeler loans and personal loans will stake up in that order in terms of risk profile.

Risk Mitigation: In addition to careful scrutiny of borrower/pool additional security in the form of adequate cash collaterals and other securities may be obtained to ensure that they all qualify for similar rating.

6. **Bankruptcy Risk :** If the originator of securitized debt instruments in which the Scheme invests is subject to bankruptcy proceedings and the court in such proceedings concludes that the sale of the assets from originator to the trust was not a 'true sale', and then the Scheme could experience losses or delays in the payments due.

Risk Mitigation: Normally, specific care is taken in structuring the securitization transaction so as to minimize the risk of the sale to the trust not being construed as a 'true sale'. It is also in the interest of the originator to demonstrate the transaction as a true sell to get the necessary revenue recognition and tax benefits.

7. **Liquidity and Price risk :** Presently, secondary market for securitized papers is not very liquid. There is no assurance that a deep secondary market will develop for such securities. This could limit the ability of the investor to resell them. Thus, Securitised debt instruments are generally held to maturity.

8. **Risks due to possible prepayments :** Asset securitization is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments Full prepayment of underlying loan contract may arise under any of the following circumstances;

- Obligor pays the Receivable due from him at any time prior to the scheduled maturity date of that Receivable; or
- Receivable is required to be repurchased by the Seller consequent to its inability to rectify a material misrepresentation with respect to that Receivable; or
- The Servicer recognizing a contract as a defaulted contract and hence repossessing the underlying Asset and selling the same

In the event of prepayments, investors may be exposed to changes in tenor and yield.

Risk Mitigation: A certain amount of prepayments is assumed in the calculations at the time of purchase based on historical trends and estimates. Further a stress case estimate is calculated and additional margins are built in.

9. **Bankruptcy of the Investor's Agent If Investor's agent becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the recourse of Investor's Agent to the assets/receivables is not in its capacity as agent/Trustee but in its personal capacity, then an Investor could experience losses or delays in the payments due under the swap agreement.**

Risk Mitigation: All possible care is normally taken in structuring the transaction and drafting the underlying documents so as to provide that the assets/receivables if and when held by Investor's Agent is held as agent and in Trust for the Investors and shall not form part of the personal assets of Investor's Agent.

RISK MANAGEMENT STRATEGIES

The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in thematic equity funds. The risk control process involves identifying & measuring the risk through various risk measurement tools.

The Fund has identified following risks and designed risk management strategies, which are embedded in the investment process to manage such risks.

Risk & Description specific to Equities	Risk mitigants / management strategy
Equity Schemes :	
Quality risk : Risk of investing in stocks with poor performance	Portfolio carefully selected to only include high quality stocks
Market risk : Risk of adverse price movement in portfolio	Equity as an asset class tends to be volatile in the short term. The fund being a thematic fund is likely to have a higher volatility as compared to a diversified fund. The investors will be appraised of the same.
Concentration risk : Risk of undue concentration in a single stock	The fund manager will have appropriate risk management policies to ensure that the portfolio is not unduly concentrated
Liquidity risk : Risk of liquidity impact of entering/ exiting the underlying stocks in the portfolio	The fund manager will give due care to the liquidity of the stocks while deciding its allocation to the portfolio
Liquid Schemes :	
Quality risk : Risk of investing in unsustainable / weak companies	Stringent credit evaluation process to ensure high quality portfolio
Reinvestment risk : Risk of changes in interest rates impacting the fund as existing securities mature or on fresh inflows / outflows into the fund	Close tracking of different maturity buckets. Investors have to bear a certain amount of interest rate risk as it is the inherent nature of the fund
Concentration risk : Risk of concentration in the portfolio	Create a well-distributed portfolio with defined issuer limits
Liquidity risk : High impact costs at the time of buying or selling.	Create a high quality portfolio with liquid securities which have low impact cost on buying/selling
Income / Debt Schemes :	
Quality risk : Risk of investing in unsustainable / weak companies	Stringent credit evaluation process to ensure high quality portfolio
Market/ Interest rate risk : Risk of bonds prices falling as compared to their purchase prices as a result of rise in interest rates	To the extent of the scheme's allocation to 'mark-to-market' securities investors will be exposed to market risk
Concentration risk : Risk of concentration in the portfolio	Create a well-distributed portfolio with defined issuer limits

Basis risk : Movement in yields in the MTM bonds held by the schemes may be different from overall change in interest rates
Liquidity risk : High impact costs at the time of buying or selling.

Fund of Funds Schemes :

Quality risk : Risk of investing in fund with poor performance
Liquidity risk : Risk of liquidity impact of entering/ exiting the underlying funds
Concentration risk :

Volatility: Price volatility due to volatility in the equity and debt markets

Create a high quality portfolio with liquid securities that minimize basis risk

Create a high quality portfolio with liquid securities which have low impact cost on buying / selling

Fund universe carefully selected to only include high quality schemes
 Scheme will ensure that the investment made by the scheme underlying funds are not material to the overall AuM of the underlying scheme
 Invest in multiple funds with varying investment style and allocation to different segment of the equity and debt markets
 Control the asset allocation of the scheme to manage volatility. The scheme can go underweight or overweight equity relative to debt based on the expected volatility in the 2 asset classes.

*In case of IDFC-SS(50-50)EF: "Standard & Poor's ("S&P") is a division of The McGraw-Hill Companies, Inc., a New York corporation. Among other things, S&P is engaged in the business of developing, constructing, compiling, computing and maintaining various equity indices that are recognized worldwide as benchmarks for U.S. stock market performance. Without limiting any of the foregoing, IISL and S&P expressly disclaim any and all liability for any damages or losses arising out of or related to the Products, including any and all direct, special, punitive, indirect, or consequential damages (including lost profits), even if notified of the possibility of such damages."

The scheme would predominantly invest in Equity and Equity related instruments pertaining to Small and Mid cap companies in line with the investment objective of the scheme. Investing in such companies may involve more risks than investing in large cap companies on account of higher market volatility and market fluctuations, it may also accordingly affect returns of the investors. Historically, the small and mid cap stocks have experienced lower liquidity than large cap stocks, hence the liquidity risks are also expected to be relatively higher. Thus, investing in the defined portfolio may involve greater risk as compared to investing in more liquid stocks forming part of instruments with large capitalization.

"The IDFC Sterling Equity Fund ("Product") is not sponsored, endorsed, sold or promoted by India Index Services & Products Limited (IISL). IISL makes no representation or warranty, express or implied to the owners of the product or any member of the public regarding the advisability of investing in securities generally or in the Product particularly or the ability of the CNX Midcap Index (name of the index) to track general stock market performance in India. The relationship of IISL to the IDFC Asset Management Company Limited (name of third party licensee) is in respect of the using of the trademark and trade name of CNX Midcap Index (name of the index) which is determined, composed and calculated by IISL without regard to the IDFC Asset Management Company Limited (name of third party licensee) or the product. IISL has no obligation to take the needs of IDFC Asset Management Company Ltd. or the owners of the Product into consideration in determining, composing or calculating the CNX Midcap Index (name of the index). IISL is not responsible for nor has participated in the determination of the timing of, prices at, or quantities of the Product to be issued or in the determination or calculation of the equation by which the Product is to be converted into cash. IISL has no obligation or liability in connection with the administration, marketing or trading of the Product. (II) TRANSACTION CHARGES

In accordance with SEBI circular no. CIR/IMD/DF/13/2011 dated August 22, 2011, Transaction Charge per subscription of Rs.10,000/- and above shall be charged from the investors and shall be payable to the distributors/ brokers (who have opted in for charging the transaction charge) in respect of applications routed through distributor/ broker relating to Purchases / subscription / new inflows only (lump sum and SIP), subject to the following:

- For Existing / New investors: Rs.100 / Rs.150 as applicable per subscription of Rs. 10,000/- and above
- Transaction charge for SIP shall be applicable only if the total commitment through SIP amounts to Rs.10,000/- and above. In such cases the transaction charge would be recovered in maximum 4 successful installments.
- There shall be no transaction charge on subscription below Rs.10,000/-.
- There shall be no transaction charges on direct investments.

The Transaction Charge as mentioned above shall be deducted by the AMC from the subscription amount of the Unit Holder and paid to the distributor and the balance shall be invested in the Scheme. The statement of account shall clearly state that the net investment as gross subscription less transaction charge and give the number of units allotted against the net investment.

The requirement of minimum application amount shall not be applicable if the investment amount falls below the minimum amount required due to deduction of transaction charges from the subscription amount.

The AMCs shall be responsible for any malpractice/mis-selling by the distributor while charging transaction costs.

COMPARISON OF EQUITY / INCOME SCHEMES WITH OTHER SCHEMES OF IDFC MUTUAL FUND IS AS UNDER

Fund	Comparison
IDFC Imperial Equity Fund	It is a diversified equity fund. It uses an active portfolio construction approach with large cap bias.
IDFC Equity Fund	Tracks the index of the large cap stocks and invests in IPO opportunities.
IDFC Strategic Sector (50-50) Equity Fund	It is a large-cap focused fund that builds a portfolio with part concentration risk of a sector.
IDFC Classic Equity Fund	It is a diversified equity fund that captures the breadth of the market. It can invest across the capitalization universe.
IDFC India GDP Growth Fund	It invests across capitalization universe and invests in sectors that reflects India's high growth through a diversified portfolio.
IDFC Sterling Equity Fund	It is a diversified equity fund that Builds a portfolio of small & mid-cap companies.
IDFC Premier Equity Fund	It is a diversified equity fund that looks at young and high growth companies. Builds a portfolio of a companies with strong tailwind of cultural and societal trends.
IDFC Arbitrage Fund & IDFC Arbitrage Plus Fund	Both these schemes do not take directional investments calls, The schemes invests in arbitrage opportunities in cash & derivative segments unlike other equity schemes of IDFC Mutual Fund which take directional investments.
IDFC Tax Advantage (ELSS) Fund	This Scheme is an Equity Linked Savings Scheme; Specified Investors in the Scheme are entitled to deductions of the amount invested in Units of the Scheme, subject to a maximum of Rs. 1,00,000 under and in terms of Section 80 C (2) (xiii) of the Income Tax Act, 1961.

IDFC Asset Allocation Fund of Fund (AP, MP, CP), IDFC Monthly Income Plan & IDFC All Seasons Bond Fund : All the schemes are Fund of Fund schemes. IDFC All Seasons Bond Fund predominantly invests in debt schemes/ Funds of IDFC Mutual Fund/ Other Mutual Funds unlike IDFC Asset Allocation Fund of Fund (AP, MP, CP) and IDFC Monthly Income Plan that invests in equity funds & Debt Funds of IDFC MF & other Mutual Fund schemes.

UNITHOLDERS' INFORMATION

Account statement:

- An allotment confirmation specifying the units allotted shall be sent by way of email and/or SMS within 5 Business Days of receipt of valid application to the Unit holders registered e-mail address and/or mobile number.
- Thereafter, a Consolidated Account Statement (CAS) containing details relating to all the transactions carried out by the investor across all schemes of all mutual funds during the month and holding at the end of the month shall be sent to the Unit holder in whose folio transactions have taken place during that month, on or before 10th of the succeeding month.
- In case of a specific request received from the Unit holders, the AMC/Fund will provide an account statement (reflecting transactions of the Fund) to the investors within 5 Business Days from the receipt of such request.
- Further, the CAS detailing holding across all schemes of all mutual funds at the end of every six months (i.e. September/ March), shall be sent by mail/email on or before 10th day of succeeding month, to all such Unit holders in whose folios no transaction has taken place during that period. The half yearly consolidated account statement will be sent by e-mail to the Unit holders whose e-mail address is available, unless a specific request is made to receive in physical form.
- The holding(s) of the beneficiary account holder for units held in demat mode will be shown in the statement issued by respective Depository Participants (DPs) periodically.

For more details, please refer the Scheme Information Document (SID) and Statement of Additional Information (SAI).

Annual Financial Results:

The Scheme wise annual report or an abridged summary thereof shall be sent:

- (i) by e-mail to the Unit holders whose e-mail address is available with the Fund, (ii) in physical form to the Unit holders whose email address is not registered with the Fund and/or those Unit holders who have opted / requested for the same.

The scheme wise annual report or an abridged summary shall be sent by mail/e-mail not later than four months from the date of closure of the relevant accounting year (i.e. 31st March each year).

The physical copy of the scheme wise annual report or abridged summary thereof shall be made available to the investors at the registered office of the AMC.

A link of the scheme annual report or abridged summary thereof shall be displayed prominently on the website of the Fund and shall also be displayed on the website of Association of Mutual Funds in India (AMFI).

Half yearly Disclosures : Portfolio / Financial Results (This is a list of securities where the corpus of the scheme is currently invested. The market value of these investments is also stated in portfolio disclosures)

The mutual fund shall publish a complete statement of the scheme portfolio and the unaudited financial results, within one month from the close of each half year (i.e. 31st March and 30th September), by way of an advertisement at least, in one National English daily and one regional newspaper in the language of the region where the head office of the mutual fund is located.

The mutual fund may opt to send the portfolio to all unit holders in lieu of the advertisement (if applicable).

(To be signed by all applicants/unitholders if mode of holding is Joint'.)

INSTRUCTIONS AND TERMS AND CONDITIONS

- IDFC Mutual Fund offers it's unitholders, a facility to register more than one bank account in their folio/s. Individuals, HUFs, Sole proprietor firms can register upto five bank accounts and a non-individual investor can register upto ten bank accounts in a folio. Any more bank accounts, even if mentioned or provided, will not be registered unless accompanied by deletion request to delete any existing bank accounts.
- Unitholder(s) are strongly advised to register their various bank accounts and continuously update the bank account details with the mutual fund, using this facility well in advance and specify any one of registered bank account for payment of redemption proceeds with each redemption request. If any of the registered bank accounts are closed/ altered, please intimate such change with an instruction to delete/alter it from of our records using this form.
- Bank registration/deletion request from unitholder/s will be accepted and processed only if all the details and necessary documents are attached. The request is liable to be rejected if it is not filled completely and in case of any ambiguous/incorrect/incomplete information.
- The first/sole unit holder in the folio should be amongst any one of the bank account holders. Unit holder(s) cannot provide the bank account(s) of any other person or where the first/sole unitholder is not an account holder in the bank account provided.
- Unitholder(s) need to attach any one of the following mandatory documents in original, in respect of each bank account for registering the bank accounts, failing which the particular bank account will not be registered. This will help in verification of the account details and register them accurately.
Cancelled cheque of the new bank mandate with first unit holder name and bank account number printed on the face of the cheque **OR** a Self attested bank statement **OR** self-attested copy of the Bank passbook with current entries (not older than 3 months) **OR** Bank Letter duly signed by branch manager/authorized personnel
AND Cancelled cheque of the existing (old) bank mandate with first unit holder name and bank account number printed on the face of the cheque **OR** original bank account statement / Pass book **OR** original letter issued by the bank on the letterhead confirming the bank account holder with the account details, duly signed and stamped by the Branch Manager **OR** in case such bank account is already closed, a duly signed and stamped original letter from such bank on the letter head of bank, confirming the closure of said account
 - If photocopy of any documents is submitted, the copy should be certified by the bank or investors must produce original for verification.
 - All documents submitted should clearly evidence the bank name, account number and name of all account holders.
- While registering multiple bank accounts, the unitholder(s) has to specify any one bank account as the 'Default Bank Account'. If the 'Default Bank Account' is not specified, the fund reserves the right to designate any of the bank accounts as 'Default Bank Account'. Default Bank Account will be used for all dividend payouts and redemption payouts under circumstances mentioned below.
 - No other registered bank account is specified in the specific redemption request for receiving redemption proceeds.
 - A new non-registered bank account is specified in the specific redemption request for receiving redemption proceeds.
 - Maturity proceeds of investments in Fixed Maturity Plans (i.e. FMPs).
- The investors can change the default bank account by submitting this form. In case multiple bank accounts are opted for registration as default bank account, the mutual fund retains the right to register any one of them as the default bank account at it's discretion.
- Bank Account Details with Redemption Request: Please note the following important points related to payment of redemption proceeds:
 - Proceeds of any redemption request will be sent only to a bank account that is already registered and validated in the folio at the time of redemption transaction processing.
 - Investor may choose to mention any of the existing registered bank account with redemption request for receiving redemption proceeds. If no registered bank account is mentioned, default bank account will be used.
 - If unitholder(s) provide a new and unregistered bank mandate with a specific redemption request (with or without necessary supporting documents) such bank account will not be considered for payment of redemption proceeds.

AMC will follow the concept of cooling period as enumerated in AMFI circular number 135/BP/17/10-11 dated October 22, 2010, whenever any change of bank mandate request is received / processed few days prior to submission of a redemption request or on the same day as a standalone change request.

The entire activity of verification of cooling period cases and release of redemption payment shall be carried out within the period of 10 working days from the date of redemption. This is in accordance with sub clause (c) of Regulation 53 of the Securities and Exchange Board of India (Mutual Fund) regulations, 1996 and SEBI circular no. SEBI/MFD/CIR/2/266/2000 dated 19th May 2000.

In case a redemption request is received before the change of bank details has been validated and registered, the redemption request would be processed to the currently registered (old) bank account.
- The registered bank accounts will also be used to identify the pay-in proceeds. Hence, unit holder(s) are advised to register their various bank accounts in advance using this facility and ensure that payments for ongoing purchase transactions are from any of the registered bank accounts only, to avoid fraudulent transactions and potential rejections due to mismatch of pay-in bank details with the accounts registered in the folio.
- This facility of multiple bank registration request or any subsequent addition/ change/ deletion in the registered bank accounts would be effected within 10 business days from the receipt of a duly completed application form and a confirmation letter will be sent within 15 business days. Unitholder(s) should preserve this letter for their reference, as the account statement will reflect default bank mandate only.
- If in an NRI folio, purchase investments are vide SB or NRO bank account, the bank account types for redemption can be SB or NRO only. If the purchase investments are made vide NRE account(s), the bank accounts types for redemption can be SB/ NRO/ NRE.
- The requests for addition/change/deletion/modification in the registered bank account(s) should be submitted using the designated application form only. Requests received on a plain paper are liable to be rejected.
- IDFC Mutual Fund, AMC, it's registrar and other service providers shall not be held liable for any loss arising to the unit holder(s) due to the credit of the redemption proceeds into any of the bank accounts registered in the folio.

THIRD PARTY PAYMENT RULES

- 1 In order to enhance compliance with Know your Customer (KYC) norms under the Prevention of Money Laundering Act, 2002 (PMLA) and to mitigate the risks associated with acceptance of third party payments, Association of Mutual Funds of India (AMFI) issued best practice guidelines on "risk mitigation process against third party instruments and other payment modes for mutual fund subscriptions". AMFI has issued the said best practice guidelines requiring mutual funds/asset management companies to ensure that Third-Party payments are not used for mutual fund subscriptions
- 2a. The following words and expressions shall have the meaning specified herein:
 - (a) **"Beneficial Investor"** is the first named applicant/ investor in whose name the application for subscription of Units is applied for with the Mutual Fund.
 - (b) **"Third Party"** means any person making payment towards subscription of Units in the name of the Beneficial Investor.
 - (c) **"Third Party payment"** is referred to as a payment made through instruments issued from a bank account other than that of the first named applicant/ investor mentioned in the application form.

Illustrations

Illustration 1: An Application submitted in joint names of A, B & C along with cheque issued from a bank account in names of B, C & Y. This will be considered as Third Party payment.

Illustration 2: An Application submitted in joint names of A, B & C along with cheque issued from a bank account in names of C, A & B. This will not be considered as Third Party payment.

Illustration 3: An Application submitted in joint names of A, B & C along with cheque issued from a bank account in name of A. This will not be considered as Third Party payment.
- 2b. IDFC Mutual Fund/ IDFC Asset Management Company Limited ('IDFC AMC') will not accept subscriptions with Third Party payments except in the following exceptional cases, which is subject to submission of requisite documentation/ declarations:
 - (i) Payment by Parents/Grand-Parents/Related Persons* on behalf of a minor in consideration of natural love and affection or as gift for a value not exceeding 50,000/- each regular Purchase or per SIP installment.
 - (ii) Payment by Employer on behalf of employee(s) under Systematic Investment Plan (SIP) Payroll deductions.
 - (iii) Custodian on behalf of an FII or a Client.

* 'Related Person' means any person investing on behalf of a minor in consideration of natural love and affection or as a gift.
- 2c. Applications submitted through the above mentioned 'exceptional cases' are required to comply with the following, without which applications for subscriptions for units will be rejected / not processed / refunded.
 - (i) Mandatory KYC for all investors (guardian in case of minor) and the person making the payment i.e. third party.
 - (ii) Submission of a complete and valid 'Third Party Payment Declaration Form' from the investors (guardian in case of minor) and the person making the payment i.e. third party.
- 2d. Investor(s) are requested to note that any application for subscription of Units of the Scheme(s) of IDFC Mutual Fund accompanied with Third Party payment other than the above mentioned exceptional cases as described in Rule (2b) above is liable for rejection without any recourse to Third Party or the applicant investor(s).

The above mentioned Third Party Payment Rules are subject to change from time to time. Please contact any of the Investor Service Centres of IDFC AMC or visit our website www.idfcmf.com for any further information or updates on the same.

INSTRUCTIONS FOR THIRD PARTY PAYMENT DECLARATION FORM

1. GENERAL INSTRUCTIONS

Please read the terms of the Key Information Memorandum, the Scheme Information Document (SID) and Statement of Additional Information (SAI) carefully before filling the Third Party Payment Declaration Form (hereinafter referred to as 'Declaration Form').

The Declaration Form should be completed in ENGLISH and in BLOCK LETTERS only. Please tick in the appropriate box for relevant declarations wherever applicable. Please do not overwrite. For any correction / changes (if any) made in the Declaration Form, the corrections made shall be authenticated by canceling and re-writing the correct details and counter-signed by the Third Party and the Beneficial Investor(s).

Applications along with the Declaration Form completed in all respects, must be submitted at the Official Points of Acceptance / Investor Service Centres (ISCs) of IDFC Mutual Fund.

In case the Declaration Form does not comply with the above requirements, IDFC Mutual Fund /IDFC AMC retains the sole and absolute discretion to reject / not process such Declaration Form and refund the subscription money and shall not be liable for any such rejection.

2. BENEFICIAL INVESTOR INFORMATION

The Third Party should provide the Folio Number of the Beneficial Investor already having an account in any of the IDFC Mutual Fund Schemes in Section 1. In case the Beneficial Investor does not have a Folio Number, the Third Party should mention the Application Number as stated in the Application Form. Name must be written in full.

3. THIRD PARTY INFORMATION

"Third Party" includes the Parent, Grand Parent, Related Person, Custodian, or Employer, making payment towards subscription of Units in the name of the Beneficial Investor(s).

Full Name and relationship of Third Party with the Beneficial Investor must be provided.

The Relationship declared by the Third Party will suggest that the payment made on behalf of Beneficial Investor(s) is:

- On behalf of a minor in consideration of natural love and affection or as gift for a value not exceeding ₹ 50,000/- (which includes each regular purchase or per SIP installment) made by Parents/Grand Parents/ Related Persons (This limit of ₹ 50,000 shall not be applicable for investments in IDFC Children's Gift Fund); or
- On behalf of employee under Systematic Investment Plans through Payroll deductions made by Employer; or
- On behalf of an FI or a Client made by the Custodian.

Mailing address and contact details of Third Party must be written in full.

4. THIRD PARTY PAYMENT DETAILS

Third Party must provide in the Declaration Form the details of the Pay-in Bank Account i.e. account from which subscription payment is made in the name of the Beneficial Investor (s).

The Declaration Form with incomplete payment details shall be rejected. The following document(s) is/are required to be submitted by Third Party as per the mode of payment selected:

(i) Source of funds - if paid by cheque

In case the account number and account holder name of the third party is not pre-printed on the cheque, then the third party should provide any one of the following documents:

- a copy# of the bank passbook or a statement of bank account having the name and address of the account holder and account number;
- a letter (in original) from the bank on its letterhead certifying that the third party maintains an account with the bank, along with information like bank account number, bank branch, account type, the MICR code of the branch & IFSC Code (where available). The said letter should be certified by the bank manager with his / her full signature, name, employee code, bank seal and contact number.

the original documents along with the documents mentioned above should be submitted to the ISCs / Official Points of Acceptance of IDFC Mutual Fund. The copy of such documents will be verified with the original documents to the satisfaction of the IDFC AMC/ IDFC Mutual Fund / Registrar and Transfer Agent. The original documents will be returned across the counter after due verification.

(ii) Source of funds - if funded by pre-funded investments such as Pay Order, Demand Draft, Banker's cheque etc.

A Certificate (in original) from the issuing banker with the purchase application, stating the Account holder's name and the Account Number which has been debited for issue of the instrument. The said Certificate should be duly certified by the bank manager with his / her full signature, name, employee code, bank seal and contact number.

(iii) Source of funds - if paid by RTGS, Bank Account-to-Account Transfer, NEFT, ECS, etc.

Acknowledged copy of the instruction to the bank stating the account number debited.

(iv) Source of funds - if paid by a pre-funded instrument issued by the Bank against Cash

IDFC AMC/IDFC Mutual Fund will not accept any purchase applications from investor if accompanied by a pre-funded instrument such as Pay Order, Demand Draft, Banker's cheque etc. issued by a bank against cash funded by third party for investments of ₹ 50,000/- or more. The third party should provide a Certificate (in original) obtained from the bank giving name, address and PAN (if available) of the person who has requested for the payment instrument. The said Certificate should be duly certified by the bank manager with his / her full signature, name, employee code, bank seal and contact number.

5. SIGNATURE(S)

Signature(s) should be in English or in any Indian Language. Declarations on behalf of minors should be signed by their Guardian.

6. PERMANENT ACCOUNT NUMBER

It is mandatory for the Third Party to mention the permanent account number (PAN) irrespective of the amount of Purchase*. In order to verify that the PAN of Third Party has been duly and correctly quoted therein, the Third Party shall attach along with the Declaration Form, a photocopy of the PAN card duly self-certified along with the original PAN card. The original PAN Card will be returned immediately across the counter after verification.

*includes fresh/additional purchase, Systematic Investment Plan. Declaration Forms not complying with the above requirement will not be accepted/ processed.

7. PREVENTION OF MONEY LAUNDERING

SEBI vide its circular reference number ISD/CIR/RR/AML/1/06 dated January 18, 2006 mandated that all intermediaries including Mutual Funds should formulate and implement a proper policy framework as per the guidelines on anti money laundering measures and also to adopt a Know Your Customer (KYC) policy.

The Third Party should ensure that the amount invested in the Scheme is through legitimate sources only and does not involve and is not designated for the purpose of any contravention or evasion of the provisions of the Income Tax Act, Prevention of Money Laundering Act, Prevention of Corruption Act and / or any other applicable law in force and also any laws enacted by the Government of India from time to time or any rules, regulations, notifications or directions issued thereunder.

To ensure appropriate identification of the Third Party and with a view to monitor transactions for the prevention of money laundering, IDFC AMC/ IDFC Mutual Fund reserves the right to seek information, record investor's telephonic calls and or obtain and retain documentation for establishing the identity of the third party, proof of residence, source of funds, etc. It may re-verify identity and obtain any incomplete or additional information for this purpose.

IDFC Mutual Fund, IDFC AMC, IDFC AMC Trustee Company Limited ("IDFC Trustee") and their Directors, employees and agents shall not be liable in any manner for any claims arising whatsoever on account of freezing the folios/ rejection of any application / allotment of Units or mandatory redemption of Units due to non compliance with the provisions of the Act, SEBI/AMFI circular(s) and KYC policy and / or where the AMC believes that transaction is suspicious in nature within the purview of the Act and SEBI/AMFI circular(s) and reporting the same to FIU-IND.

For further details, please refer Section 'Prevention of Money Laundering' under the Statement of Additional Information available on our website www.idfcmf.com.

8. KNOW YOUR CUSTOMER (KYC) COMPLIANCE

It is mandatory for the Third Party to quote the KYC Compliance Status and attach proof of KYC Compliance viz. KYC Acknowledgement Letter (or Printout of KYC Compliance Status downloaded from CVL website (www.cvlindia.com)) using the PAN Number. Declaration Form without a valid KYC Compliance of Third Party will be rejected.

In the event of non-compliance of KYC requirements, IDFC Trustee/IDFC AMC reserves the right to freeze the folio of the investor(s) and affect mandatory redemption of unit holdings of the investors at the applicable NAV, subject to payment of exit load, if any.
